SUPPLEMENTARY INFORMATION:

Under the Virus-Serum-Toxin Act (21 U.S.C. 151 *et seq.*), a veterinary biological product must be shown to be pure, safe, potent, and efficacious before a veterinary biological product license may be issued. A field test is generally necessary to satisfy prelicensing requirements for veterinary biological products. Prior to conducting a field test on an unlicensed product, an applicant must obtain approval from the Animal and Plant Health Inspection Service (APHIS), as well as obtain APHIS' authorization to ship the product for field testing.

To determine whether to authorize shipment and grant approval for the field testing of the unlicensed product referenced in this notice, APHIS considers the potential effects of this product on the safety of animals, public health, and the environment. Using the risk analysis and other relevant data, APHIS has prepared an environmental assessment (EA) concerning the field testing of the following unlicensed veterinary biological product:

Requester: Merial, Inc.

Product: Marek's Disease Vaccine, Serotype 1, Live Virus.

Possible Field Test Locations: Arkansas, Georgia, Kentucky, North Carolina, Tennessee, and Texas.

The above-mentioned product is a live Marek's Disease serotype 1 vaccine virus containing the long terminal repeat of the reticuloendotheliosis virus. The attenuated vaccine is intended for use in healthy day-old chickens, as an aid in the prevention of Marek's disease caused by very virulent Marek's disease virus.

The EA has been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

Unless substantial issues with adverse environmental impacts are raised in response to this notice, APHIS intends to issue a finding of no significant impact (FONSI) based on the EA and authorize shipment of the above product for the initiation of field tests following the close of the comment period for this notice.

Because the issues raised by field testing and by issuance of a license are identical, APHIS has concluded that the EA that is generated for field testing would also be applicable to the proposed licensing action. Provided that the field test data support the conclusions of the original EA and the issuance of a FONSI, APHIS does not intend to issue a separate EA and FONSI to support the issuance of the product license, and would determine that an environmental impact statement need not be prepared. APHIS intends to issue a veterinary biological product license for this vaccine following completion of the field test provided no adverse impacts on the human environment are identified and provided the product meets all other requirements for licensing.

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau.

Title: Comparing Health Insurance Measurement Error (CHIME).

OMB Control Number: 0607–XXXX.

Form Number(s): No forms; respondent information collected by telephone interview.

Type of Request: Regular submission.

Number of Respondents: 5,000 Households.

Average Hours per Response: 13 minutes.

Burden Hours: 3,028 hours.

Needs and Uses: The goal of the study is to assess measurement error in health coverage estimates that is ascribable to the questionnaire across the CPS and ACS health insurance modules using administrative records as a truth source. Both ''absolute'' reporting accuracy (the survey report compared to the administrative record data) and ''relative'' reporting accuracy (comparing absolute accuracy across questionnaire treatments) will be evaluated. The analysis will be used to understand the magnitude, direction and patterns of misreporting for three main purposes: (1) To provide Census program staff with empirical data to develop and refine edits and/or to include research notes for data users so they can make their own adjustments for misreporting; (2) to equip the wider research community with information that could serve as a guide for deciding which among the various surveys best suits their needs; and (3) to contribute to the general survey methods research literature on measurement error. Analysis will also inform reporting accuracy of health coverage related to the Affordable Care Act (ACA). Specifically, for coverage that is known to be obtained from the marketplace, we will explore whether respondents report that coverage, the source they cite (direct-purchase, government, etc.), and the accuracy with which they answer a question on subsidized premiums.

Affected Public: Individuals or households.

Frequency: One time.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13, United States Code, sections 141, 182 and 193.
