submissions available to the public or entering the comment into ADAMS.

II. Discussion

On December 18, 2014, the NRC published a request for public comment on draft NUREG–2126, “Standard Review Plan for Conventional Uranium Mills and Heap Leach Facilities.” Pursuant to the provisions of part 40 of Title 10 of the *Code of Federal Regulations*, (10 CFR), “Domestic Licensing of Source Material,” an NRC materials license is required to conduct uranium recovery activities by conventional mill or heap leach techniques. Applicants for a new license and operators seeking an amendment or renewal of an existing license are required to provide detailed information on the facilities, equipment, and procedures to be used in the proposed activities. This information is used by the NRC staff to determine whether the proposed activities will be protective of public health and safety and the environment. Each section in draft NUREG–2126 provides guidance on what information is to be reviewed, the basis for the review, how the NRC staff review is to be accomplished, what the staff will find acceptable in a demonstration of compliance with applicable regulations, and the evaluation criteria for determining compliance with the applicable regulations. Draft NUREG–2126 is intended to improve the understanding of the NRC staff’s review process by interested members of the public and the uranium recovery industry. Any interested party may submit comments on draft NUREG–2126 for consideration by the NRC staff. The public comment period closed on March 18, 2015. The National Mining Association (NMA) submitted a letter on February 26, 2015 (ADAMS Accession No. ML15062A629), requesting a 90-day extension of the public comment period on this document. Additionally, the State of Utah submitted a letter on March 16, 2015 requesting a 60-day extension of the public comment period on this document (ADAMS Accession No. ML15082A286). The Commission may grant, in its discretion, the additional reasonable opportunity for the submission of comments. In the present case, as the request for an extension from NMA points out, there are two notable current **Federal Register** notices on this general subject matter that have been noticed for public comment, including the present document, as well as the Environmental Protection Agency’s (EPA) proposed 40 CFR part 192 rulemaking. The State of Utah cites its current workload and role in

regulating the only operating conventional uranium mill in the United States as reasons for extending the comment period. As such, these factors justify the Commission granting additional reasonable opportunity for the submission of comments. The NRC has decided to reopen the public comment period on this document until June 18, 2015, to allow more time for members of the public to develop and submit their comments.

Dated at Rockville, Maryland, this 8th day of April 2015.

For the Nuclear Regulatory Commission.

Andrew Persinko,

Deputy Director, Division of Decommissioning, Uranium Recovery and Waste Programs, Office of Nuclear Material Safety and Safeguards.
