SUPPLEMENTARY INFORMATION: The CASAC was established pursuant to the Clean Air Act (CAA) Amendments of 1977, codified at 42 U.S.C. 7409(d)(2), to review air quality criteria and NAAQS and recommend any new NAAQS and revisions of existing criteria and NAAQS as may be appropriate. The CASAC shall also provide advice, information, and recommendations to the Administrator on the scientific and technical aspects of issues related to the criteria for air quality standards, research related to air quality, sources of air pollution, and of adverse effects which may result from various strategies to attain and maintain air quality standards. The CASAC is a Federal Advisory Committee chartered under the Federal Advisory Committee Act (FACA), 5 U.S.C., App. 2. Section 109(d)(1) of the CAA requires that the Agency periodically review and revise, as appropriate, the air quality criteria and the NAAQS for the six "criteria" air pollutants, including oxides of nitrogen. EPA is currently reviewing the primary (health-based) NAAQS for nitrogen dioxide (NO₂) as an indicator for health effects caused by the presence of oxides of nitrogen in the ambient air.

Pursuant to FACA and EPA policy, notice is hereby given that the CASAC Oxides of Nitrogen Primary NAAQS Review Panel will hold a public meeting to peer review EPA's *Integrated Science Assessment (ISA) for Oxides of Nitrogen—Health Criteria (Second External Review Draft—January 2015)* and *Review of the National Ambient Air Quality Standards for Nitrogen Dioxide: Risk and Exposure Assessment Planning Document*. The CASAC Oxides of Nitrogen Primary NAAQS Review Panel and the CASAC will comply with the provisions of FACA and all appropriate SAB Staff Office procedural policies.

The CASAC Oxides of Nitrogen Primary NAAQS Review Panel previously peer reviewed EPA's *Integrated Science Assessment for Oxides of Nitrogen—Health Criteria (External Review Draft—November 2013)* as reported in a letter to the EPA Administrator, dated June 10, 2014 (EPA-CASAC-14-002).

Technical Contacts: Any technical questions concerning the *Integrated Science Assessment for Oxides of Nitrogen—Health Criteria (Second External Review Draft—January 2015)*

should be directed to Dr. Molini Patel (patel.molini@epa.gov), EPA Office of Research and Development, and technical questions concerning the *Review of the National Ambient Air Quality Standards for Nitrogen Dioxide: Risk and Exposure Assessment Planning Document* should be directed to Dr. Scott Jenkins (jenkins.scott@epa.gov), EPA Office of Air and Radiation.

Availability of Meeting Materials:

Prior to the meeting, the review documents, agenda and other materials will be accessible through the calendar link on the blue navigation bar at <http://www.epa.gov/casac/>.

Procedures for Providing Public Input:

Public comment for consideration by EPA's federal advisory committees and panels has a different purpose from public comment provided to EPA program offices. Therefore, the process for submitting comments to a federal advisory committee is different from the process used to submit comments to an EPA program office.

Federal advisory committees and panels, including scientific advisory committees, provide independent advice to EPA. Members of the public can submit comments for a federal advisory committee to consider as it develops advice for EPA. Interested members of the public may submit relevant written or oral information on the topic of this advisory activity, and/or the group conducting the activity, for the CASAC to consider during the advisory process. Input from the public to the CASAC will have the most impact if it provides specific scientific or technical information or analysis for CASAC panels to consider or if it relates to the clarity or accuracy of the technical information. Members of the public wishing to provide comment should contact the DFO directly.

Oral Statements: In general, individuals or groups requesting an oral presentation at a public meeting will be limited to five minutes. Each person making an oral statement should consider providing written comments as well as their oral statement so that the points presented orally can be expanded upon in writing. Interested parties should contact Mr. Aaron Yeow, DFO, in writing (preferably via email) at the contact information noted above by May 26, 2015 to be placed on the list of public speakers.

Written Statements: Written statements should be supplied to the DFO via email at the contact information noted above by May 26, 2015 so that the information may be made available to the Panel members for their consideration. It is the SAB Staff Office general policy to post written

comments on the Web page for the advisory meeting or teleconference. Submitters are requested to provide an unsigned version of each document because the SAB Staff Office does not publish documents with signatures on its Web sites. Members of the public should be aware that their personal contact information, if included in any written comments, may be posted to the CASAC Web site. Copyrighted material will not be posted without explicit permission of the copyright holder.

Accessibility: For information on access or services for individuals with disabilities, please contact Mr. Aaron Yeow at (202) 564-2050 or yeow.aaron@epa.gov. To request accommodation of a disability, please contact Mr. Yeow preferably at least ten days prior to each meeting to give EPA as much time as possible to process your request.

Dated: April 16, 2015.

Thomas H. Brennan,

Deputy Director, EPA Science Advisory Staff Office.

SUPPLEMENTARY INFORMATION:

Background

On February 6, 2006, the Agency published a final rule for the protection of human subjects in research (71 FR 24 6138) that called for creating a new, independent human studies review board (*i.e.*, HSRB). The HSRB is a federal advisory committee operating in accordance with the Federal Advisory Committee Act (FACA) 5 U.S.C. App. 2 section 9 (Public Law 92-463). The HSRB provides advice, information, and recommendations to EPA on issues related to scientific and ethical aspects of human subjects research. The major objectives of the HSRB are to provide advice and recommendations on: (1) Research proposals and protocols that include human subjects; (2) reports of completed research with human subjects; and (3) how to strengthen EPA's programs for protection of human subjects of research. Typically, the HSRB reviews protocols and completed studies involving pesticide studies, such as worker exposure studies with agricultural handlers applying pesticides in field conditions; janitorial maintenance personnel applying antimicrobial pesticides in commercial settings; and field efficacy studies for skin applied insect repellent products. The HSRB reports to the EPA Administrator through EPA's Science Advisor. General information concerning the HSRB, including its charter, current membership, and activities can be found on the EPA Web site at <http://www.epa.gov/osa/hsrb/>.

HSRB members serve as special government employees or regular government employees. Members are
