Form Number: N/A.
OMB Number: 0584-NEW.
Expiration Date of Approval: Not yet determined.

Type of Information Collection Request: New information collection.

Abstract: The objective of the Child Nutrition Program Operations Study-II (CN-OPS-II) is to collect timely data on policies, administrative, and operational issues on the Child Nutrition Programs. The ultimate goal is to analyze these data and to provide input for new legislation on Child Nutrition Programs as well as to provide pertinent technical assistance and training to program implementation staff.

The CN-OPS-II will help the Food and Nutrition Service (FNS) better

understand and address current policy issues related to Child Nutrition Programs (CNP) operations. The policy and operational issues include, but are not limited to, the preparation of the program budget, development and implementation of program policy and regulations, and identification of areas for technical assistance and training. Specifically, this study will help FNS obtain:

- General descriptive data on the Child Nutrition (CN) program characteristics to help FNS respond to questions about the nutrition programs in schools;
- Data related to program administration for designing and revising program regulations, managing resources, and reporting requirements; and
- Data related to program operations to help FNS develop and provide training and technical assistance for School Food Authorities (SFAs) and State Agencies responsible for administering the CN programs.

The activities to be undertaken subject to this notice include:

- Conducting a multi-modal (e.g. paper, Web, and telephone) survey of approximately 1,500 SFA Directors.
- Conducting a paper survey of all 56 State Agency CN Directors.

Affected Public: State, Local and Tribal Governments.

Type of Respondents: 1,500 SFA Directors and 56 State CN Directors.

Estimated Total Number of Respondents: 1,556.

Frequency of Response: 3.

Estimated Total Annual Responses: 4,668.

Estimate of Time per Respondent and Annual Burden: Public reporting burden for this collection of information is estimated to average one hundred fifty (150) minutes per Self-Administered Survey for the SFA Directors and the State Agency CN Directors (this includes 60 minutes for data gathering, 60 minutes to respond to the questionnaire, and 30 minutes for pre-notification and follow-up activities). The average time across all respondents is 50 minutes (0.83 hours). The annual reporting burden is estimated at 3,890 hours (see table below).

Needs and Uses: The National Survey of Children's Health (NSCH) Pretest is a small-scale (N = 16,000 addresses) national pretest conducted prior to fielding the first year production survey. This pretest is necessary to assess survey methodology, evaluate the survey instrument, and test operational procedures and processes. The pretest sample will consist of several panels to assess data collection mode preferences (Mail or Internet) of respondents, amount of respondent cash incentives (\$5 or \$10) needed to gain cooperation and participation in the survey, and telephone as a method of nonresponse follow-up.

Plans for pretest data collection include two modes. The first mode that will be tested is a mail out/mail back of a self-administered paper-and-pencil interviewing (PAPI) screener instrument followed by a separate mail out/mail back of a PAPI age-based topical instrument. The second mode that will be tested is an Internet survey that contains the screener and topical instruments. The Internet instrument
