

Categorical Exclusion Revision for Trenching

The USGS excavates trenches across potentially active faults to assess the history of earthquakes along those faults. The study of ancient earthquakes and their rates of occurrence is known as paleoseismology. Paleoseismic data obtained from trenching studies is a fundamental input for USGS National Seismic Hazard Maps. The USGS National Seismic Hazard Maps are used to inform emergency response and to guide building codes. The revision of this categorical exclusion will allow for a more efficient NEPA review.

Public comments were solicited through a notice placed in the **Federal Register** on August 22, 2014 (79 FR 49799). The proposed language for the categorical exclusion in the notice was as follows: "Digging and subsequent site restoration of exploratory trenches not to exceed one acre of surface disturbance."

Categorical Exclusion for Water Monitoring Equipment

One of the seven science mission areas of the USGS, the Water Mission Area, is tasked with collecting and disseminating reliable, impartial, and timely information that is needed to understand the Nation's water resources. The Water Mission Area actively promotes the use of this information by decision makers to: (1) Minimize loss of life and property as a result of water-related natural hazards, such as floods, droughts, and land movement; (2) effectively manage groundwater and surface-water resources for domestic, agricultural, commercial, industrial, recreational, and ecological uses; (3) protect and enhance water resources for human health, aquatic health, and environmental quality; and (4) contribute to the wise physical and economic development of the Nation's resources for the benefit of present and future generations. To achieve this science mission, the USGS constructs and operates a variety of hydrologic and water-quality monitoring structures and equipment at streams, rivers, springs, wellheads, and other sites across the Nation. After these structures are no longer needed for scientific data collection, they are removed and the site is restored. The revision of this categorical exclusion will allow for a more efficient NEPA review.

Public comments were solicited through the same notice placed in the **Federal Register** on August 22, 2014 (79 FR 49799). The proposed language for the categorical exclusion as set out in

the notice was as follows: "Operation, construction, installation, and removal—including restoration of sites to the pre-structure condition or equivalent of the surrounding environment—of hydrologic and water-quality monitoring structures and equipment including but not limited to weirs, cableways, streamgaging stations, groundwater wells, and meteorologic structures."

Public Comments

No public comments were received.

Categorical Exclusion

The Department of the Interior will add the following categorical exclusions to the Departmental Manual at 516 DM 9, section 9.5 Categorical Exclusions:

E. Operation, construction, installation, and removal—including restoration of sites to the pre-structure condition or equivalent of the surrounding environment—of hydrologic and water-quality monitoring structures and equipment including but not limited to weirs, cableways, streamgaging stations, groundwater wells, and meteorologic structures; and

I. Digging and subsequent site restoration of exploratory trenches not to exceed one acre of surface disturbance.

Willie R. Taylor,

Director, Office of Environmental Policy and Compliance.

BILLING CODE 4310-AM-P

INTERNATIONAL TRADE COMMISSION

[USITC SE-15-015]

Government in the Sunshine Act Meeting Notice

AGENCY HOLDING THE MEETING: United States International Trade Commission.

TIME AND DATE: May 7, 2015 at 11 a.m.

PLACE: Room 101, 500 E Street SW., Washington, DC 20436, Telephone: (202) 205-2000.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. Agendas for future meetings: none
2. Minutes
3. Ratification List
4. Vote in Inv. Nos. 731-TA-1013 (Second Review)(Saccharin from China). The Commission is currently scheduled to complete and file its determination and views of the Commission on May 20, 2015.
5. Outstanding action jackets: none

In accordance with Commission policy, subject matter listed above, not disposed of at the scheduled meeting, may be carried over to the agenda of the following meeting.

By order of the Commission:

Issued: April 28, 2015.

Lisa R. Barton,

Secretary to the Commission.

BILLING CODE 7020-02-P

DEPARTMENT OF JUSTICE

[OMB Number 1110-NEW]

Agency Information Collection Activities; Proposed eCollection Activities; Proposed eComments Requested; Approval of a New Collection; Rap Back Services Form (1-796)

AGENCY: Federal Bureau of Investigation, Department of Justice.

ACTION: 30-day notice.

SUMMARY: The Department of Justice (DOJ), Federal Bureau of Investigation (FBI), Criminal Justice Information Services (CJIS) Division will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection was previously published in the **Federal Register** (80 FR 9753), on February 24, 2015, allowing for a 60 day comment period.

DATES: Comments are encouraged and will be accepted for an additional 30 days until June 3, 2015.

FOR FURTHER INFORMATION CONTACT: If you have comments, especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention Department of Justice Desk Officer, Washington, DC 20503. Additionally, comments may be submitted via email to OIRA_submission@omb.eop.gov.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the
