[Project No. 2101-096]

Sacramento Municipal Utility District; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects has reviewed the application for amendment to authorize the construction of the new Slab Creek powerhouse and boating flow release valve for the Upper American River Hydroelectric Project. The project is located on Silver Creek and the Rubicon and South Fork American Rivers in El Dorado and Sacramento counties,

California. The project occupies federal lands administered by the Bureau of Land Management and by the U.S. Forest Service within the Eldorado National Forest.

The application, filed with the Commission on August 27, 2014, contains an Environmental Analysis in its Exhibit E (pages 49-143). On April 20, 2015, the licensee filed a supplemental biological resource analysis to its application. In staff's independent review of the licensee's Exhibit E and the April 20, 2015 supplement, staff has decided to adopt the licensee's Environmental Analysis and issue it as staff's Environmental Assessment (EA). The EA analyzes the potential environmental impacts of the project plus the proposed mitigation measures and concludes that granting the amendment to licensing would not constitute a major federal action that would significantly affect the quality of the human environment.

A copy of the EA and the supplemental biological resource analysis is on file with the Commission and is available for public inspection. The EA and supplement may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link.
