community and mainstream institutions of social integration, such as pre-prison employment within the labor market; their challenges and expectations for reentry back into the community as measured by SPI through the extent of substance abuse, mental health, and medical problems of prisoners, treatment they may have received for problems, programs in which they participated while in prison, and their motivation (i.e., intrinsic or extrinsic) to participate in programs.

In addition to collecting the survey data, in an effort to minimize burden on facilities and inmates and to conduct future studies, inmates will be asked to provide consent to link their 2015–2016 SPI survey data to their criminal history records and any updates made to those records over the next 10 years. The administrative records will be used to augment the survey data and to conduct prospective recidivism studies of the 2015–2016 SPI sample of inmates who are released from prison within three to five years of completion of the survey. Inmates will also be asked to provide their Social Security number (SSN) to link their survey data to records from the Social Security Administration (SSA). The goal of this effort is to provide more detailed information about the pre-prison earnings and benefits of inmates without taking up more of their time during the interview.

(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: The 2015–2016 SPI consists of a pretest and a national study. The goal of the pretest is to test the functionality of the Computer Assisted Personal Interviewing (CAPI) instrument prior to fielding it on a national scale. The pretest will include one state and one federal correctional facility providing a roster of inmates at 0.5 hours per facility for a total of 1 hour; prison staff escorting 60 inmates to and from interview sites at 0.5 hours per inmate for a total of 30 hours; and 60 inmates responding to the questionnaire at 1.80 hours per interview for a total of 60 hours. The pretest will result in a total expected burden of approximately 91 hours. For the SPI national study, a maximum of 416 state and federal correctional facilities will provide a roster of inmates at 0.5 hours per facility for a total of 208 hours; prison staff will escort a maximum of 33,200 inmates to and from interview sites at 0.5 hours per inmate for a total of 16,600 hours; a maximum of 33,200 inmates will respond to the questionnaire at 1.80 hours per interview for a total of 33,200 hours; and a maximum of 50 state departments of corrections and the federal Bureau of Prisoners will provide post-survey follow-up information at 0.25 hours per jurisdiction for a total of 13 hours. The SPI national study will result in an expected maximum burden of approximately 50,021 hours.

(6) An estimate of the total public burden (in hours) associated with the collection: The estimated total public burden is 50,112 annual hours.

I. Background

In accordance with §51.118 of Title 10 of the Code of Federal Regulations, the NRC is making available final Supplement 52 to the GEIS regarding the renewal of FirstEnergy Nuclear Operating Company’s (FENOC) operating license NPF–3 for an additional 20 years of operation for Davis-Besse Nuclear Power Station, Unit 1 (Davis-Besse). DATES: The final Supplement 52 to the GEIS is available as of May 7, 2015.

ADDRESSES: Please refer to Docket ID NRC–2010–0298 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

• Federal Rulemaking Web site: Go to http://www.regulations.gov and search for Docket ID NRC–2010–0298. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the FOR FURTHER INFORMATION CONTACT section of this document.

• NRC’s Agencywide Documents Access and Management System (ADAMS): You may obtain publicly-available documents online in the ADAMS Public Documents collection at http://www.nrc.gov/reading-rm/adams.html. To begin the search, select “ADAMS Public Documents” and then select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to pdr.resource@nrc.gov. The final Supplement 52 to the GEIS is in ADAMS under Accession No. ML15112A098 for Volume 1 and Accession No. ML15113A187 for Volume 2.

II. Discussion

As discussed in Section 9.4 of the final Supplement 52 to the GEIS, the NRC determined that the adverse environmental impacts of license renewal for Davis-Besse are not so great that preserving the option of license renewal for energy-planning decisionmakers would be unreasonable. This recommendation is based on: (1) The analysis and findings in the GEIS; (2) information provided in the environmental report and other documents submitted by FENOC; (3) consultation with Federal, State, local, and Tribal agencies; (4) the NRC staff’s independent environmental review; and (5) consideration of public comments received during the scoping process and on the Draft Supplemental Environmental Impact Statement.

Dated at Rockville, Maryland, this 29th day of April 2015.

For the Nuclear Regulatory Commission.

Brian D. Wittick,
Chief, Projects Branch 2, Division of License Renewal, Office of Nuclear Reactor Regulation.
