SUPPLEMENTARY INFORMATION:

I. Background

The ETA 203, Characteristics of the Insured Unemployed, is a monthly snapshot of the demographic composition of the claimant population in the Unemployment Insurance system. It is based on those who file a claim in the week containing the 19th day of the month, which reflects unemployment during the week containing the 12th day of the month. This corresponds with the sample frame used by the Bureau of Labor Statistics for the production of labor force statistics they produce. This report serves a variety of socio-economic needs because it provides aggregate data reflecting unemployment insurance claimants' sex, race/ethnic group, age, industry, and occupation.

II. Review Focus

The Department is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- enhance the quality, utility, and clarity of the information to be collected; and
- minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
