Assessment of Ecological/Social/Cultural/Economic Sustainability, Conditions, and Trends for the Gila National Forest

AGENCY: Forest Service, USDA.

ACTION: Notice of initiating the assessment phase of the Gila National Forest land management plan revision.

SUMMARY: The Gila National Forest, located in southwestern New Mexico, is initiating the forest planning process pursuant to the 2012 Forest Planning Rule. This process results in a Forest Land Management Plan which describes the strategic direction for management of forest resources for the next fifteen years on the Gila National Forest. The first phase of the process, the assessment phase, is beginning and interested parties are invited to contribute in the development of the assessment (36 CFR 219.6). The trends and conditions identified in the assessment will help in identifying the current plan's need for change, and aid in the development of plan components. The Forest hosted a series of community conversations with key stakeholders in March 2015. Additional public participation opportunities are forthcoming in the near future to discuss the assessment process—information on these opportunities and all future public participation opportunities will be made available on
