

and FEMA with a way of producing summary reports of services provided across all programs funded.

The components of the tool kit are listed and described below:

- **Encounter logs.** These forms document all services provided. Completion of these logs is required by the crisis counselors. There are three types of encounter logs: (1) Individual/Family or Household Crisis Counseling Services Encounter Log; (2) Group Encounter Log; and (3) Weekly Tally Sheet.

- **Individual/Family or Household Crisis Counseling Services Encounter Log.** Crisis counseling is defined as an interaction that lasts at least 15 minutes and involves participant disclosure. This form is completed by the Crisis Counselor for each service recipient, defined as the person or persons who actively participated in the session (e.g., by verbally participating), not someone who is merely present. The same form may be completed with other family or household members who are actively engaged in the visit. Information collected includes demographics, service characteristics, risk factors, event reactions, and referral data.

- **Group Encounter Log.** This form is used to identify either a group crisis counseling encounter or a group public education encounter. A check at the top identifies the class of activities (i.e., counseling or education). Information collected includes services characteristics, group identity and characteristics, and group activities.

- **Weekly Tally Sheet.** This form documents brief educational and supportive encounters not captured on any other form. Information collected includes service characteristics, daily tallies and weekly totals for brief educational or supportive contacts, and material distribution with no or minimal interaction.

- **Assessment and Referral Tools.** This tool provides descriptive information about intense users of services either child/youth or adults, defined as all individuals receiving a third individual crisis counseling visit. This tool will be used beginning three months postdisaster and will be completed by the crisis counselor.

- **Participant Feedback.** These surveys are completed by and collected from a sample of service recipients, not every recipient. A time sampling

approach (e.g., soliciting participation from all counseling encounters one week per quarter) will be used. Information collected includes satisfaction with services, perceived improvements in self-functioning, types of exposure, and event reactions.

- **CCP Service Provider Feedback.** These surveys are completed by and collected from the CCP service providers anonymously at six months and one year postevent. The survey will be coded on several program-level as well as worker-level variables. However, the program itself will be identified and shared with program management only if the number of individual workers was greater than 20.

There are no changes to the Individual Encounter Log, Group Encounter Log, Weekly Tally, and the Assessment and Referral Tools since the last approval. Revisions include the addition of mobile device questions to the Service Provider Feedback Form and minor revisions to the gender question on the Participant Feedback Form and Service Provider Feedback Form.

The table below is the estimates of annualized hour burden.

Form	Number of respondents	Responses per respondents	Hours per responses	Total hour burden
Individual Crisis Counseling Services Encounter Log	200	196	.13	5,096
Group Encounter Log	100	33	.07	231
Weekly Tally Sheet	200	33	.2	1,320
Assessment and Referral Tools	200	14	.25	700
Participant Feedback Survey	1,000	1	.25	250
Service Provider Feedback Survey	100	1	.41	41
Total	1,800	7,638
