The Student Information System (SIS) is designed to collect on-line applications from students for NIST programs such as the Student Volunteer Program (SVP) and Summer High School Intern Program (SHIP). The purpose of the application is to obtain information needed to evaluate applicant qualifications for potential positions.

The Student Information System is an online application which collects basic biographical information about the student. The application contains four sections. The second section collects work and volunteer experience including start and end date, hours worked, name and address of employer, supervisor's contact information, job description, and job-related skills. The third section collects any special training, knowledge, skill, ability, and/or publications that demonstrate the applicant's skill sets to perform a position. The fourth section collects education information to include current enrollment, name and address of the educational institution, grade point average, and expected date of program completion.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for revision and extension of a currently approved information collection.

NOAA Fisheries, Southeast Fisheries Science Center, annually collects

socioeconomic data from commercial fishermen in the Gulf of Mexico and South Atlantic shrimp fisheries who hold one or more permits for harvesting shrimp from federal waters (U.S. Exclusive Economic Zone). Information about revenues, variable and fixed costs, capital investment and other socioeconomic information is collected from a random sample of permit holders. Additionally, we will pilot a short demographic/socioeconomic survey of shrimp vessel crews. Next to nothing is known about the 4–5 thousand individuals crewing federally permitted shrimp vessels. These data are needed to conduct socioeconomic analyses in support of management of the shrimp fishery and to satisfy legal requirements. The data will be used to assess how fishermen will be impacted by and respond to federal regulation likely to be considered by fishery managers.

II. Method of Collection

The information will be collected on paper using a mail survey.

III. Data

OMB Control Number: 0648–0591.
Form Number(s): None.

Type of Review: Regular submission (revision and extension of a currently approved collection).

Affected Public: Business or other for-profit organizations; individuals or households.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a current information collection.

National Marine Fisheries Service (NMFS) requires any United States (U.S.) citizen issued a Special Coral Reef Ecosystem Fishing Permit to complete logbooks and submit them to NMFS (50 CFR 665). The Special Coral Reef Ecosystem Fishing Permit is authorized under the Fishery Ecosystem Plans for American Samoa Archipelago, Hawaiian Archipelago, Mariana Archipelago, and Pacific Remote Island Areas. The information in the logbooks is used to obtain fish catch/fishing effort data on

coral reef fishes and invertebrates harvested in designated low-use marine protected areas and on those listed in the regulations as potentially-harvested coral reef taxa in waters of the U.S. exclusive economic zone in the western Pacific region. These data are needed to determine the condition of the stocks, whether the current management measures are having the intended effects, and to evaluate the benefits and costs of changes in management measures. The logbook information includes interactions with protected species, including sea turtles, monk seals, and other marine mammals, which are used to monitor and respond to incidental takes of endangered and threatened marine species.

II. Method of Collection

Reports are submitted to NMFS in the form of paper logbook sheets and paper transshipment forms within 30 days of each landing of coral reef harvest. No electronic forms or web-based reporting is currently available. Notifications are submitted via telephone.
