Specific uses include: Facilitation for DoD Adjudicators and Security Managers to obtain accurate up-to-date eligibility and access information on all personnel (military, civilian and contractor personnel) adjudicated by the DoD. The DoD Adjudicators and Security Managers are also able to update eligibility and access levels of military, civilian and contractor personnel nominated for access to sensitive DoD information.

Affected Public: Individuals and Federal Government.

To comply with the Intelligence Report and Terrorism Prevention Act (IRTPA) of 2004, the Defense Information System for Security (DISS) program was established to design and implement an IT system to support Security and Suitability processes across the Department of Defense (DoD). Through an incremental approach, DISS will, in the future, replace legacy security clearance systems by phasing in new or enhanced systems as part of the DISS Family of Systems (FoS). The records within these applications are used for personnel security, suitability, fitness, access management, continuous evaluation of the subject, and National Security by providing a common, comprehensive medium to record, document, and store investigation and adjudicative documentation and adjudicative actions within the Department, federal agencies, non-DOD, and DOD contractors. These applications will provide an evaluation status, outcome, and updates of investigative and adjudicative actions and decisions from trusted information providers, requestors; provides the ability for visit requests; subjects to self-report required information; and/or provides the ability for the subjects to be continuously evaluated for the subject's security clearance. It will also be used to compile statistical data used for analyses and studies. Decentralized access is authorized at the adjudication facilities, personnel security interfaces, services, DOD Component, approved Non-DoD agencies, and Industry security offices with a DD254 and Industry who is directly supporting continuous evaluation.

The DISS has also been designated as the repository for adjudicative results for Suitability and HSPD-12 determinations by the 13 July 2011 USD(I) memo "Storage of Adjudicative Results in the Defense Information

System for Security." The DISS (CATS) has been designated as the DoD non-Intelligence Community IT system for case management and adjudications by the 10 April 2009 USD(I) memo "Designation of the DoD Case Management and Adjudication Systems." Currently, CATS processes over 500,000 cases annually; electronically producing favorable adjudicative decisions for approximately 24% of Secret level cases. Further, the 3 May 2012 Deputy Secretary of Defense Memo "DoD Central Adjudication Facilities (CAF) Consolidation" consolidated all DoD Central Adjudication Facilities (CAF) into one consolidated DoD CAF responsible for personnel security adjudicative functions as well as favorable Suitability and HSPD-12 adjudications. The DISS (CATS) is the DOD CAF's designated IT case management system.

Respondents are Facility Security Managers or DoD Adjudicators who update eligibility and access levels of military, civilian and contractor personnel nominated for access to sensitive DoD information. DISS will be the authoritative source for clearance information resulting in accesses determinations to sensitive/classified information and facilities. Collection and maintenance of personal data in DISS is required to facilitate the initiation, investigation and adjudication of information relevant to DoD security clearances and employment suitability determinations for active duty military, civilian employees and contractors requiring such credentials.
