

Employment and Wage Estimates, mean wages.” The salaries that assisted in calculating the labor mix had slightly declined. This change has caused a decrease in the cost per report in this collection from \$110 per report to \$101 per report. The total estimated cost to industry is \$1,122,716 a year, a difference of \$ 961,784 calculated from the prior collection approved by OMB. For future approvals, we project that the cost to report will decrease significantly. The burden related to MV diesel reporting will phase out and virtually all laboratory qualification applications for test methods will be completed, decreasing total industry burden.
