Information Collection Activities: Oil-Spill Response Requirements for Facilities Located Seaward of the Coast Line; Proposed Collection; Comment Request

ACTION: 60-day notice.

SUMMARY: To comply with the Paperwork Reduction Act of 1995 (PRA), BSEE is inviting comments on a collection of information that we will submit to the Office of Management and Budget (OMB) for review and approval. The information collection request (ICR) concerns a renewal to the paperwork requirements in the regulations under *Oil-Spill Response Requirements for Facilities Located Seaward of the Coast Line*.

DATES: You must submit comments by July 28, 2015.

ADDRESSES: You may submit comments by either of the following methods listed below.

- Electronically go to <http://www.regulations.gov>. In the Search box, enter BSEE-2015-0009 then click search. Follow the instructions to submit public comments and view all related materials. We will post all comments.

- Email cheryl.blundon@bsee.gov. Mail or hand-carry comments to the Department of the Interior; Bureau of Safety and Environmental Enforcement; Regulations and Standards Branch; ATTN: Cheryl Blundon; 45600 Woodland Road, Sterling, VA 20166. Please reference ICR 1014-0007 in your comment and include your name and return address.

FOR FURTHER INFORMATION CONTACT: Cheryl Blundon, Regulations and Standards Branch at (703) 787-1607 to request additional information about this ICR.

SUPPLEMENTARY INFORMATION:

Title: 30 CFR part 254, *Oil-Spill Response Requirements for Facilities Located Seaward of the Coast Line*.

OMB Control Number: 1014-0007.

Abstract: Section 2(b)(3) of E.O. 12777 delegated to the Secretary of the Interior (Secretary) those responsibilities under section 311(j)(1)(C) of the Federal Water Pollution Control Act (FWPCA) (October 18, 1991; 56 FR 54757), requiring the Secretary to establish procedures, methods, and requirements for equipment to prevent and contain discharges of oil and hazardous substances from offshore facilities, including associated pipelines. Under section 2(d)(3) of E.O. 12777, section 311(j)(5) of FWPCA, and section 4202(b)(4) of OPA, the Secretary is required to issue regulations requiring the owners or operators of offshore facilities, including associated pipelines, to prepare and submit response plans that ensure the availability of private spill-response personnel and equipment and to permit the operation of offshore facilities, including associated pipelines, without approved response plans if certain conditions are met. Under section 2(e)(3) of E.O. 12777 and section 311(j)(6)(A) of FWPCA, the Secretary must require periodic inspections of containment booms and equipment used to remove discharges at offshore facilities, including associated pipelines. The Secretary has re-delegated these responsibilities to the Director, BSEE.

The FWPCA, as amended by the Oil Pollution Act of 1990 (OPA), requires that a spill-response plan be submitted

for offshore facilities prior to February 18, 1993. The OPA specifies that after that date, an offshore facility may not handle, store, or transport oil unless a plan has been submitted. Regulations at 30 CFR 254 establish requirements for spill-response plans for oil-handling facilities seaward of the coast line, including associated pipelines.

To provide supplementary guidance and procedures, BSEE issues Notices to Lessees and Operators (NTLs) on a regional or National basis. Regulation 30 CFR 250.103 allows BSEE to issue NTLs to clarify, supplement, or provide more detail about certain requirements. Additional guidance pertaining to Oil-Spill Response Requirements is provided by NTLs when needed.

Regulations implementing these responsibilities are among those delegated to BSEE. The regulations under 30 CFR 254 pertain to preparation and submittal of response plans that ensure the availability of private-spill response personnel and equipment.

We use the information collected under 30 CFR 254 to determine compliance with OPA by lessees/operators. Specifically, BSEE needs the information to:

- Determine that lessees/operators have an adequate plan and are sufficiently prepared to implement a quick and effective response to a discharge of oil from their facilities or operations.
 - Review plans prepared under the regulations of a State and submitted to BSEE to satisfy the requirements in 30 CFR 254 to ensure that they meet minimum requirements of OPA.
 - Verify that personnel involved in oil-spill response are properly trained and familiar with the requirements of the spill-response plans and to lead and witness spill-response exercises.
 - Assess the sufficiency and availability of contractor equipment and materials.
 - Verify that sufficient quantities of equipment are available and in working order.
 - Oversee spill-response efforts and maintain official records of pollution events.
 - Assess the efforts of lessees/operators to prevent oil spills or prevent substantial threats of such discharges.
- No questions of a sensitive nature are asked. Generally, no proprietary information is collected under 30 CFR 254. However, if respondents did submit proprietary information, we protect such information under the Freedom of Information Act (5 U.S.C. 552) and DOI's implementing regulations (43 CFR 2), 30 CFR 250.197, "Data and information to be made
