BEA offers electronic filing through its eFile system for use in reporting on the BE-15 annual survey forms. In addition, BEA posts all its survey forms and reporting instructions on its Web site (www.bea.gov/fdi). These may be downloaded, completed, printed, and submitted via fax or mail.

Potential respondents of the BE-15 are selected from those U.S. business enterprises that were required to report on the 2012 BE-12, Benchmark Survey of Foreign Direct Investment in the United States, along with those U.S. business enterprises that subsequently entered the direct investment universe. The BE-15 is a sample survey, as described; universe estimates are developed from the reported sample data.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Annual Survey of U.S. Direct Investment Abroad (BE-11) obtains

sample data on the financial structure and operations of U.S. parents and their foreign affiliates. The data are needed to provide reliable, useful, and timely measures of U.S. direct investment abroad to assess its impact on the U.S. and foreign economies. The sample data are used to derive universe estimates in nonbenchmark years from similar data reported in the BE-10, Benchmark Survey of U.S. Direct Investment Abroad, which is conducted every five years. The data collected include balance sheets; income statements; property, plant, and equipment; employment and employee compensation; merchandise trade; sales of goods and services; taxes; and research and development activity.

The survey, as proposed, incorporates two changes that were made to the 2014 BE-10, Benchmark Survey of U.S. Direct Investment Abroad, and five new proposed changes. The following two questions that were added to the 2014 benchmark survey will be added to the BE-11 survey: (1) A question to collect the city in which each foreign affiliate is located; and (2) for majority-owned foreign affiliates with assets, sales, or net income greater than \$300 million, a question to collect data on cash and cash equivalents on the balance sheet. Other proposed changes are: (1) Two items will be added to the balance sheet section for the U.S. reporter: (i) Equity investments in foreign affiliates, and (ii) all other assets; (2) a question will be added to collect the form of organization of the U.S. reporter; (3) a question will be added to collect expenditures for research and development performed by new foreign affiliates with assets, sales, or net income between \$25 million and \$60 million; (4) a question will be added to the Claim for Not Filing form to collect the names and BEA ID numbers of any foreign affiliates for which BEA requested a filing but which did not meet the filing criteria; and (5) the BE-11E (abbreviated) sample form for foreign affiliates will be eliminated. The exemption level for reporting on the proposed survey is unchanged from the 2013 BE-11 survey.

II. Method of Collection

BEA contacts potential respondents by mail in March of each year; responses covering a reporting company's fiscal year ending during the previous calendar year are due by May 31. Reports are required from each U.S. person that has a direct and/or indirect ownership interest of at least 10 percent of the voting stock in an incorporated foreign business enterprise, or an equivalent interest in an unincorporated foreign business enterprise, and that

meets the additional conditions detailed in the BE-11 forms and instructions. Entities required to report will be contacted individually by BEA. Entities not contacted by BEA have no reporting responsibilities.

BEA offers electronic filing through its eFile system for use in reporting on the BE-11 annual survey forms. In addition, BEA posts all its survey forms and reporting instructions on its Web site (www.bea.gov/dia). These may be downloaded, completed, printed, and submitted via fax or mail.

Potential respondents of the BE-11 are selected from those U.S. parents that reported owning foreign business enterprises in the 2014 BE-10, Benchmark Survey of U.S. Direct Investment Abroad, along with entities that subsequently entered the direct investment universe. The BE-11 is a sample survey, as described; universe estimates are developed from the reported sample data.
