Endangered and Threatened Species; Identification and Proposed Listing of Eleven Distinct Population Segments of Green Sea Turtles (*Chelonia mydas*) as Endangered or Threatened and Revision of Current Listings; Public Hearings; Extension of Comment Period

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce; United States Fish and Wildlife Service (USFWS), Interior.

ACTION: Proposed rule; extension of comment period and public hearing schedule.

SUMMARY: On March 23, 2015, we (NMFS and USFWS, or the Services) published a proposed rule to revise the green sea turtle (*Chelonia mydas*; hereafter referred to as the green turtle) listings under the Endangered Species Act (ESA). We proposed to remove the current range-wide listing and, in its place, list eight distinct population segments (DPSs) as threatened and three as endangered. We opened a public comment period that lasted through June 22, 2015, announced a public hearing in Honolulu, Hawaii, and solicited requests for additional public hearings. With this document, we announce additional public hearings in Guam, the Commonwealth of the Northern Mariana Islands (CNMI), and American Samoa. To allow adequate time for comments after the last public hearing, we extend the public comment period through July 27, 2015.

DATES: Public hearings will be held from 6 to 8 p.m., with informational open houses starting at 5:30 p.m. as follows: in Pago Pago, American Samoa on July 6, 2015; in Saipan, CNMI on July 13, 2015; and in Mangilao, Guam on July 15, 2015. The comment period for the proposed rule published on March 23, 2015 (80 FR 15271), has been extended. SUPPLEMENTARY INFORMATION:**Background**

The green turtle is currently listed under the ESA as a threatened species globally, with the exception of the Florida and Mexican Pacific coast breeding populations, which are listed as endangered. On March 23, 2015 (80 FR 15271), the Services published a proposed rule to revise these listings because we find that the green turtle is composed of 11 distinct population segments (DPSs) that qualify as “species” for listing under the ESA. We proposed to remove the current range-wide listing and, in its place, list eight DPSs as threatened and three as endangered. We proposed to list the Central West Pacific DPS (including green turtles originating from Guam and CNMI) and the Central South Pacific DPS (including green turtles originating from American Samoa) as endangered. We also proposed to apply existing protective regulations to the DPSs and to continue the existing critical habitat designation (i.e., waters surrounding Culebra Island, Puerto Rico) in effect for the North Atlantic DPS. We solicited comments on these proposed actions; we indicated that comments must be received by June 22, 2015.

We received several requests for additional public hearings. In response to the requests, by this notice we announce that we will host additional public hearings in Guam, CNMI, and American Samoa, and extend the public comment period through July 27, 2015. Previously submitted comments do not need to be resubmitted.

Endangered and Threatened Wildlife and Plants; Removing Eastern Puma (=Cougar) From the Federal List of Endangered and Threatened Wildlife

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The best available scientific and commercial data indicate that the eastern puma (=cougar) (*Puma (=Felis) concolor cougar*) is extinct. Therefore, under the authority of the Endangered Species Act of 1973, as amended, we, the U.S. Fish and Wildlife Service (Service), propose to remove this subspecies from the Federal List of Endangered and Threatened Wildlife. This proposed action is based on a thorough review of all available information, which indicates that there is no evidence of the existence of either an extant population or individuals of the eastern puma and that, for various

reasons, it is highly unlikely that an eastern puma population could remain undetected over the time span since the last confirmed sighting was documented in 1938.

DATES: We will accept comments received or postmarked on or before August 17, 2015. Comments submitted electronically using the Federal eRulemaking Portal (see **ADDRESSES** below) must be received by 11:59 p.m. Eastern Time on the closing date. We must receive requests for public hearings, in writing, at the address shown in **FOR FURTHER INFORMATION CONTACT** by August 3, 2015. Informational webinars will be scheduled upon request.

SUPPLEMENTARY INFORMATION:

Information Requested

We intend that any final action resulting from this proposed rule will be based on the best scientific and commercial data available and be as accurate and effective as possible. Therefore, we invite tribal and governmental agencies, the scientific community, and other interested parties to submit comments and new data regarding this proposed rule. In particular, we are seeking targeted information and comments concerning the following:

- (1) The persistence or extinction of a breeding population of the eastern puma subspecies within its historical range;
- (2) Verifiable reports or evidence of wild-origin pumas within the historical range of the eastern puma subspecies;
- (3) Our analysis of the status of the eastern puma; and
- (4) The taxonomy of North American pumas.

Please include sufficient information with your submission (such as scientific journal articles or other publications) to allow us to verify any scientific or commercial information you include. Bear in mind that comments simply advocating or opposing the proposed action without providing supporting information will be noted but not considered in making a determination, as section 4(b)(1)(A) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*) (Act), directs that determinations as to whether any species is an endangered species or threatened species shall be made "solely on the basis of the best scientific and commercial data available."
