

wildlife, and protected species as sensitive lands or those with higher environmental benefits could be targeted. Soils, surface and groundwater, wetlands, and floodplains would benefit similarly and would also be positively impacted by reduced fertilizer and pesticide usage and lower demands on groundwater for irrigation. Recreation related to wildlife would be expected to benefit from targeting environmentally sensitive areas that benefit wildlife and habitats and surface water quality on and adjacent to CRP lands. Air quality would benefit from enrollment in CRP through reduced emissions from equipment, greater soil stability, and increased potential for long-term carbon sequestration as compared to typical agricultural production. No effect to socioeconomic conditions is anticipated to result from use of targeted enrollment; however, general social benefits from conservation would be realized. Overall, it is expected that using targeted enrollment could increase the quality of lands enrolled in CRP, resulting in greater environmental benefits. Targeted enrollment could provide long-term benefits to areas of sensitive vegetative communities, wildlife habitat, or water quality. Such benefits could occur throughout the U.S. in any ecoregion where targeting occurred.

Installation and maintenance of CPs could create temporary, short-term negative impacts while the work was ongoing to resources, including vegetation, wildlife, protected species, soils, surface and groundwater, floodplains, wetlands, and air quality. However, all activities would be specified in Conservation Plans, designed by NRCS, which reflect local conditions and needs for each tract of land enrolled. Once CPs are established, long-term beneficial impacts to resources would be realized.

Managed Harvesting and Routine Grazing Frequencies

Managed harvesting would be allowed to occur no more frequently than once every 3 years, but not less frequently than once in 5 years. This would require four states (California, Colorado, Arizona, and Nevada) that currently allow managed harvesting once every 10 years to have more frequent managed harvesting on new contracts where managed harvesting would be used to maintain CRP. The 2014 Farm Bill allows for the State Technical Committees (STCs) to establish routine grazing frequencies of not more than once every 2 years. More frequent harvesting and grazing could reduce the growing period between

harvests, which may cause short-term negative impacts to some types of vegetation, potentially affecting wildlife habitat, soil stability, and any adjacent wetlands, floodplains, or surface waters. Activities with direct impacts would vary by ecoregion and species composition. Long-term benefits of harvesting and grazing include maintaining early succession stages, and improving species diversity, composition, and function. Wildlife adapted to early successional habitats could benefit from more frequent harvesting and grazing. Grazing could negatively affect wildlife through displacement or competition for food resources. Both grazing and haying could result in direct mortality to some wildlife species. Protected species are not expected to be affected as site specific Environmental Evaluations on Conservation Plans would determine the presence of protected species and ensure no impacts occur. No effects to groundwater, air quality, recreation, or socioeconomic resources are anticipated. When performed in accordance with established guidelines, managed harvesting can be an effective tool for maintaining early successional stages of vegetative communities.

Emergency Haying and Grazing on Additional CP

Consecutive years of emergency haying or grazing on the same acreage would reduce the growth period and could result in long-term negative impacts to some types of vegetation, in turn affecting wildlife. Impacts to wildlife could also include direct mortality and competition for food resources. No impacts to protected species are expected due to use of site-specific Environmental Evaluations. As with managed harvesting and routine grazing, short-term impacts to soils could occur from reduced vegetation growth affecting the stability of soils. Short-term impacts to surface waters, floodplains, and wetlands could occur from increased runoff, however, adherence to site-specific NRCS Conservation Plans and oversight by STC would reduce the potential for long-term impacts to these resources. No impacts to groundwater are anticipated. In the short-term, consecutive years of emergency haying and grazing could reduce the carbon sequestration potential of CRP vegetation. Socioeconomic benefits would result from enabling producers to maintain herds during severe droughts.

Rationale for Decision

No significant impacts would occur from implementation of the Proposed

Action and no significant adverse cumulative impacts are expected. Potential negative impacts will be minimized by employment of best management practices specified in Conservation Plans and through the use of site-specific Environmental Evaluations.

Forest Service

Land Between The Lakes Advisory Board

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Land Between The Lakes Advisory Board (Board) will meet in Golden Pond, Kentucky. The Board is authorized under Section 450 of the Land Between The Lakes Protection Act of 1998 (Act) and operates in compliance with the Federal Advisory Committee Act. The purpose of the Board is to advise the Secretary of Agriculture on the means of promoting public participation for the land and resource management plan for the recreation area; and environmental education. Additional Board information, including the meeting agenda and the meeting summary/minutes can be found at the following Web site: <http://www.landbetweenthe lakes.us/about/working-together/>.

DATES: The meeting will be held on Wednesday, July 22, 2015.

All Board meetings are subject to cancellation. For status of meeting prior to attendance, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

ADDRESSES: The meeting will be held at the Land Between The Lakes Administration Building, 100 Van Morgran Drive, Golden Pond, Kentucky.

Written comments may be submitted as described under **SUPPLEMENTARY INFORMATION**. All comments, including names and addresses when provided, are placed in the record and are available for public inspection and copying. The public may inspect comments received at Land Between The Lakes Administrative Building. Please call ahead to facilitate entry into the building.

FOR FURTHER INFORMATION CONTACT:

Linda L. Taylor, Board Coordinator, by phone at 270-924-2002 or via email at ltaylor@fs.fed.us.

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8:00 a.m. and 8:00 p.m., Eastern Standard Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is:

- (1) Discuss Environmental Education; and
- (2) Effectively communicate future land management plan activities.

The meeting is open to the public. Board discussion is limited to Forest Service staff and Board members. Written comments are invited and should be sent to Tina Tilley, Area Supervisor, Land Between The Lakes, 100 Van Morgan Drive, Golden Pond, Kentucky 42211; and must be received by July 8, 2015, in order for copies to be provided to the members for this meeting. Board members will review written comments received, and at their request, oral clarification may be requested for a future meeting.

Meeting Accommodations: If you are a person requiring reasonable accommodation, please make requests in advance for sign language interpreting, assistive listening devices or other reasonable accommodation for access to the facility or proceedings by contacting the person listed in the section titled **FOR FURTHER INFORMATION CONTACT**. All reasonable accommodation requests are managed on a case by case basis.

Dated: June 11, 2015.
