

Information collected	Reason for collection
Declaration whether this proposed donation is or is not part of a series of donations to the Department.	To assist the Department in determining the scope and context of the donation, and to assist in determining whether there are any issues associated with the proffer of the gift that need to be more closely examined.
Signature, Printed Name, Date, Organization, Email address, City, State, Zip, and daytime or work phone number.	To establish the contact information of the potential donor, and have the certifier sign the certification form.

II. Data

(1) *Title:* Donor Certification Form.
OMB Control Number: 1090-0009.
Current Expiration Date: September 30, 2015.
Type of Review: Information Collection Renewal.
Affected Entities: Individuals or households, Businesses, Not-for-profit institutions, Tribal governments.
Estimated annual number of respondents: 250.
Frequency of responses: Once per prospective donation.
(2) *Annual reporting and recordkeeping burden:*
Total annual reporting per response: 20 minutes.
Total number of estimated responses: 250.
Total annual reporting: 84 hours.
(3) *Description of the need and use of the information:* This information will provide Department staff with the basis for beginning the evaluation as to whether the Department will accept the proposed donation. The authorized employee will receive the donor certification form with the proposed donation. The employee will then review the totality of circumstances surrounding the proposed donation to determine whether the Department can accept the donation and maintain its integrity, impartiality, and public confidence.

III. Request for Comments

The Departments invite comments on:
(a) Whether the collection of information is necessary for the proper performance of the functions of the agencies, including whether the information will have practical utility;
(b) The accuracy of the agencies' estimate of the burden of the collection of information and the validity of the methodology and assumptions used;
(c) Ways to enhance the quality, utility, and clarity of the information to be collected; and
(d) Ways to minimize the burden of the collection of information on respondents, including through the use of appropriate automated, electronic, mechanical, or other collection techniques or other forms of information technology.
"Burden" means the total time, effort, and financial resources expended by

persons to generate, maintain, retain, disclose, or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install, and use technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, and to complete and review the collection of information; and to transmit or otherwise disclose the information.

All written comments, with names and addresses, will be available for public inspection. If you wish us to withhold your personal information, you must prominently state at the beginning of your comment what personal information you want us to withhold. We will honor your request to the extent allowable by law. If you wish to view any comments received, you may do so by using the contact information in the **ADDRESSES** section above. A valid picture identification is required for entry into the Department of the Interior.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid Office of Management and Budget control number.

Douglas A. Glenn,

Deputy Chief Financial Officer and Director, Office of Financial Management, Department of the Interior.

Notice of Availability of a Record of Decision on the Final General Management Plan/Environmental Impact Statement, Ozark National Scenic Riverway, Missouri

AGENCY: National Park Service, Interior.
ACTION: Notice of availability.

SUMMARY: The National Park Service (NPS) announces the availability of the Record of Decision (ROD) for the Final General Management Plan/Environmental Impact Statement (GMP/EIS), Ozark National Scenic Riverways (Riverways), Missouri.

ADDRESSES: Copies of the ROD are available by request by writing to Superintendent, Ozark National Scenic Riverways, 404 Watercross Drive, P.O. Box 490, Van Buren, Missouri 63965. The document is also available on the internet at the NPS Planning, Environment, and Public Comment Web site at: <http://www.park.planning.nps.gov/>.

FOR FURTHER INFORMATION CONTACT: Superintendent Bill Black at the address above, or by telephone at 573-323-4236.

SUPPLEMENTARY INFORMATION: On January 22, 2015, the Acting Regional Director for the Midwest Region signed the ROD for the Final GMP/EIS, thereby approving it. As soon as practicable, the Riverways will begin the implementation of the selected alternative B (the preferred alternative) as described in the final GMP/EIS. Alternative B will enhance opportunities for visitors to discover and learn about the natural wonders and Ozark heritage of the National Riverways, while maintaining a mix of traditional recreational and commercial activities. Emphasis will be placed on increasing opportunities for visitor education and connections to natural resources and cultural landscapes.

This alternative focuses on providing a balance of diverse recreational opportunities and visitor experiences

along with increasing visitor education and appreciation of natural and cultural resources of the park unit. This alternative will provide a comprehensive Riverways-wide approach to resource and visitor use management. Specific management zones detailing acceptable resource conditions, visitor experience and use levels, and appropriate activities and development will be applied to Riverways' lands consistent with this concept.

A mix of private and guided traditional recreational activities like boating, floating, and horseback riding will occur under this alternative. Additional trails and a small learning center at a rehabilitated Powder Mill will be developed to better orient and inform visitors. Natural resources will be restored to more natural conditions, while maintaining greater opportunities for visitor access. Most of the Big Spring Wilderness Study Area will be recommended for wilderness designation.

The selected action and three other alternatives were analyzed in the draft and final GMP/EIS. The full range of foreseeable environmental consequences was assessed. Among the alternatives the NPS considered, the selected action best achieves a high standard of natural and cultural resource protection with improved opportunities for visitors in the park. The NPS selected alternative B as its preferred alternative following an evaluation of the effectiveness of each alternative in meeting the stated objectives of the general management plan, and the environmental benefits and adverse impacts for each alternative. This alternative provides the best combination of strategies to protect the park unit's unique natural and cultural resources and visitor experience, while improving the park unit's operational effectiveness and sustainability. It also provides other advantages to the Riverways, regional communities, partners, and stakeholders.

In addition, selection of the preferred alternative, as reflected by the analysis contained in the final GMP/EIS, will not result in the impairment of park resources and will allow the National Park Service to conserve National Riverways' resources and provide for their enjoyment by visitors.

Dated: January 22, 2015.

Patricia S. Trap,

Acting Regional Director, Midwest Region.

Editor's note: This document was received for publication by the Office of the **Federal Register** on June 18, 2015.

Notice of Availability of a Record of Decision for the White-Tailed Deer Management Plan, Environmental Impact Statement, Cuyahoga Valley National Park, Ohio

AGENCY: National Park Service, Interior.

ACTION: Notice of Availability.

SUMMARY: The National Park Service (NPS) announces the availability of the Record of Decision (ROD) for the White-Tailed Deer Management Plan/Environmental Impact Statement (plan/EIS), Cuyahoga Valley National Park (Park), Ohio.

ADDRESSES: Copies of the ROD are available by request by writing to the Chief of the Resource Management Division, Lisa Petit, Cuyahoga Valley National Park, 15610 Vaughn Road, Brecksville, Ohio 44141, telephone (440) 546-5970. The document is also available on the internet at the NPS Planning, Environment, and Public Comment Web site at: <http://www.parkplanning.nps.gov/>.

FOR FURTHER INFORMATION CONTACT: Chief of the Resource Management Division, Lisa Petit at the address or telephone number above.

SUPPLEMENTARY INFORMATION: We have issued a ROD for the final plan/EIS; on February 13, 2015, the Acting Regional Director for the Midwest Region approved the ROD. The plan/EIS analyzed four alternatives, including a no-action alternative. The full range of foreseeable environmental consequences was assessed, and appropriate mitigating measures were identified.

The NPS decision is to implement alternative D (hereinafter referred to as the "selected action"), which was identified as the NPS preferred alternative in the final plan/EIS. The selected action will utilize an adaptive management strategy. Under the selected action, the NPS will continue current park deer management actions including: Research, monitoring, and

data management; protection of restoration plantings; education and coordination; and enforcement of the existing wildlife feeding ban. In addition, the NPS will incorporate a combination of lethal and nonlethal actions to address high deer density. Lethal actions (including sharpshooting, with very limited capture/euthanasia if necessary) will be taken initially to reduce deer densities quickly. It is anticipated that in years one through four, 335 deer will be removed by sharpshooting (in addition to small numbers of deer removed by capture and euthanasia) to meet the deer density goal. Population maintenance will follow the initial reduction, and could be conducted by nonsurgical reproductive control methods, if an acceptable agent is available, or by sharpshooting. Both maintenance methods are included in the selected action to maintain maximum flexibility for future management. All actions will be carried out by NPS personnel or authorized agents.

The Record of Decision includes a summary of the purpose and need for action, identifies the selected action and all alternatives considered by the NPS, a listing of measures to minimize environmental harm, details about the monitoring program that will inform implementation of the selected action, the basis for the decision, and a description of the environmentally preferable alternative.

Dated: February 13, 2015.

Patricia S. Trap,

Acting Regional Director, Midwest Region.
