Abstract: In the final rule, EPA finalized the renewable fuels standard (RFS) program regulations at 40 CFR part 80, subpart M. We believe these provisions will facilitate the introduction of new renewable fuels as well as improve implementation of the program. These provisions includes various changes related to biogas including changes to the revised compressed natural gas (CNG)/liquefied

natural gas (LNG) pathway and amendments to various associated registration, recordkeeping, and reporting provisions. The final regulation includes a lifecycle greenhouse gas emissions analysis for renewable electricity, renewable diesel and naphtha produced from landfill biogas. Adding these new pathways will enhance the ability of the biofuels industry to supply advanced biofuels, including cellulosic biofuels, which greatly reduce the greenhouse gas emissions (GHG) compared to the petroleum-based fuels they replace. It also addresses "nameplate capacity" issues for certain production facilities that do not claim exemption from the 20 percent GHG reduction threshold. In the accompanying final rule for this ICR, EPA addressed issues related to crop residue and corn kernel fiber and finalized an approach to determining the volume of cellulosic Renewable Identification Numbers (RIN's) produced from various cellulosic feedstocks. We also included a lifecycle analysis of advanced butanol and discussed the potential to allow for commingling of compliant products at the retail facility level as long as the environmental performance of the fuels would not be detrimental. Several other amendments to the RFS2 program were included.

In the final rule, EPA also amended various changes to the E15 (gasoline containing up to 15 volume percent ethanol) mis-fueling mitigation regulations (MMR) at 40 CFR part 80, subpart N. Among the E15 changes finalized were technical corrections and amendments to sections dealing with labeling, E15 surveys, product transfer documents, and prohibited acts. Technical amendments and corrections for this regulations had no bearings on the industry estimates.

Lastly, EPA finalized changes to the survey requirements associated with the ultra-low sulfur diesel (ULSD) program. This change is not addressed here because there are fewer than nine respondents.

Form Numbers: 2

RFS1700—RFS2 Renewable Fuel Producers—Cellulosic Converted Fraction—5900—362

RFS1300—RFS2 Renewable Fuel Producers Using Crop Residue as a Feedstock Report—5900—262

Respondents/affected entities:

Producers of renewable fuels, Producers of renewable electricity, Importers of renewable fuels, Feedstock producers from waste treatment plants, Feedstock producers from landfills, Parties who own RIN's.

Respondent's obligation to respond: Mandatory.

Estimated number of respondents: 60 (total).

Frequency of response: Quarterly, annually, on occasion.

Total estimated burden: 8,889 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$1,081,415 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in Estimates EPA estimates yearly 60 respondents and 8,889 burden hours which will cost industry \$1,081,415. This is a new collection with no industry cost for comparison.

Dated: June 15, 2015.

Director, Compliance Division, Office of Transportation and Air Quality, Office of Air and Radiation.
