Title of Collection: EDFacts Data Collection School Years 2016–17, 2017–18, and 2018–19.

OMB Control Number: 1850—NEW (previously 1875–0240).

Abstract: EDFacts is a U.S. Department of Education (ED) initiative to collect, analyze, report on and promote the use of high-quality, pre-kindergarten through grade 12 (pre-K–12) performance data for use in education planning, policymaking, and management and budget decision making to improve outcomes for students. EDFacts enables the National Center for Education Statistics (NCES) to report on students, schools, staff, services, and education outcomes at the state, district, and school levels, by centralizing data provided by state education agencies, local education agencies, and schools. This centralized approach provides ED users with the ability to efficiently analyze and report on submitted data and has reduced the reporting burden for state and local data producers through the use of streamlined data collection, analysis, and reporting tools. EDFacts collects information on behalf of ED grant and program offices for approximately 180 data groups for all 50 states, Washington DC, Puerto Rico, and seven outlying

areas and freely associated states (American Samoa, Federated States of Micronesia, Guam, Marshall Islands, Commonwealth of the Northern Mariana Islands, Republic of Palau, and the U.S. Virgin Islands), the Department of Defense Education Activity (DoDEA), and the Bureau of Indian Education (BIE). NCES seeks authorization from OMB to continue its EDFacts data collection and is requesting a new clearance for the 2016–17, 2017–18, and 2018–19 school years in order to continue to provide EDFacts data to Department of Education program offices, as well as SEAs, LEAs, and schools. This collection package will be available for public comment during two open periods, a 60 day and a 30 day, and revisions will be made accordingly. This submission includes a few proposed changes to the EDFacts data collection. In addition to reviewing the proposed changes (detailed in Attachment C and the B Attachments), ED requests that SEAs and other stakeholders respond to the directed questions found in Attachment D.

SUPPLEMENTARY INFORMATION:

I. Background

The U.S. electricity sector operates a complex and highly reliable electric power system, upon which the Nation's economy and security depend. The North American Bulk Power System (BPS) is extensive, consisting of various infrastructure components, including transformers, switches, transmission towers and lines, control centers, and computer controls. Of the BPS' physical infrastructure, large power transformers (LPTs) are critical components, because the reliable operation of the BPS depends heavily on the safe and efficient operation of a network of interconnected LPTs.

LPTs have long been a concern for the U.S. electricity sector because the failure of a single unit can interrupt electricity service to a large number of customers and lead to collateral damage, and it could be difficult to quickly replace it. LPTs are large, custom-designed pieces of equipment that entail a significant capital expenditure and a long lead-time to manufacture and ship. LPTs are not usually interchangeable. System owners often own and maintain spare LPTs at a number sufficient to mitigate risks from premature failure. The limited availability of spare LPTs, and the long lead times to procure replacements, could pose a potential threat to the availability and reliability of the Nation's bulk power system in the event of an emergency where a relatively large number of existing LPTs are damaged or destroyed.

Large-scale disruptions to the U.S. BPS are rare; however, it faces a wide variety of evolving threats, including but not limited to: Cyber and physical security intrusions, weather-related
