II. Background

On April 23, 2015, FMCSA published a notice of receipt of exemption applications from certain individuals, and requested comments from the public (80 FR 22773). That notice listed 35 applicants’ case histories. The 35 individuals applied for exemptions from the vision requirement in 49 CFR 391.41(b)(10), which does not meet the vision requirement in 49 CFR 391.41(b)(10). The 16 individuals that sustained vision impairments or have had them not recently developed. Nineteen of the applicants were either born with their vision impairments or have had them since childhood.

The 16 individuals that sustained their vision conditions as adults have had it for a range of two to 52 years. Although each applicant has one eye which does not meet the vision requirement in 49 CFR 391.41(b)(10), each has at least 20/40 corrected vision in the other eye, and in a doctor’s opinion, has sufficient vision to perform all the tasks necessary to operate a CMV. Doctors’ opinions are supported by the applicants’ possession of valid commercial driver’s licenses (CDLs) or non-CDLs to operate CMVs. Before issuing CDLs, States subject drivers to knowledge and skills tests designed to evaluate their qualifications to operate a CMV.

All of these applicants satisfied the testing requirements for their State of residence. By meeting State licensing requirements, the applicants demonstrated their ability to operate a CMV, with their limited vision, to the satisfaction of the State. While possessing a valid CDL or non-CDL, these 35 drivers have been authorized to drive a CMV in intrastate commerce, even though their vision disqualified them from driving in interstate commerce. They have driven CMVs with their limited vision in careers ranging from two to 52 years. In the past three years, one driver was involved in a crash, and one was convicted of a moving violation in a CMV.

The qualifications, experience, and medical condition of each applicant were stated and discussed in detail in the April 23, 2015 notice (80 FR 22773).
