
The final interim policy guidance addresses four subjects not addressed in either the regulations or the previous policy guidance document for the CIG program. Specifically these are: (1) The measures and breakpoints for the congestion relief criterion applicable to New Starts and Small Starts projects; (2) the evaluation and rating process for Core Capacity Improvement projects, including the measures and breakpoints for all the project justification and local financial commitment criteria applicable to those projects; (3) the prerequisites for entry into each phase of the CIG process for each type of project in the CIG program, and the requirements for completing each phase of that process; and (4) ways in which certain New Starts, Small Starts, and Core Capacity Improvement projects can qualify for “warrants” entitling them to automatic ratings on some of the evaluation criteria. This final policy guidance is characterized as “interim” because, in the near future, FTA will initiate a rulemaking to amend the regulations at 49 CFR part 611 to fully carry out the authorizing statute for the CIG program, 49 U.S.C. 5309, as amended by the Moving Ahead for Progress in the 21st Century Act (Pub. L. 112–141; July 6, 2012) (“MAP–21”). The information gained through the public comment process on the interim policy guidance will inform the future rulemaking.

The final interim policy guidance being published today is approximately 100 typewritten pages in length, arranged in three stand-alone chapters for each of the three types of projects eligible for CIG funds: New Starts, Small Starts, and Core Capacity Improvements. Each chapter provides a short introduction, a discussion of eligibility for that type of project, a summary of the requirements for entry into and getting through each step of the CIG process, information on each of the project evaluation criteria, and an explanation of how FTA will determine the overall rating for a project. Each type of project in the CIG program—a New Start, Small Start, or Core Capacity Improvement—is governed by a unique set of requirements, although there are many similarities amongst the three sets of requirements.

The final interim policy guidance does not address the Program of Interrelated Projects provisions or the pilot program for expedited project delivery included in MAP–21. The Program of Interrelated Projects provisions will be addressed through future rulemaking and policy guidance updates. On July 7, 2015, FTA published in a separate Federal Register notice at 80 FR 38801 (http://www.gpo.gov/fdsys/pkg/FR-2015-07-07/pdf/2015-16515.pdf), a request for expressions of interest for the pilot program for expedited project delivery.

FTA received 539 separate comments on the proposed interim policy guidance from 41 commenters, including cities, transit operators, state agencies, metropolitan planning organizations, non-profit organizations, and interested citizens. FTA’s summary and response to these comments is available both on the agency’s public Web site at http://www.fta.dot.gov/newstarts and in the docket at http://www.regulations.gov. The public comments are available, in their entirety, on the docket at http://www.regulations.gov.

This final interim policy guidance is effective immediately. It provides technical details necessary for FTA to apply the project evaluation and rating criteria. Sponsors of New Starts, Small Starts, and Core Capacity projects need this final interim policy guidance to gather and submit the data and information needed by FTA to move their projects into and through the process. In turn, FTA needs this data from project sponsors to prepare the agency’s annual report to Congress on capital investment funding recommendations for the forthcoming Federal fiscal year, as required by 49 U.S.C. 5309(o)(1). For these reasons, and in accordance with the Administrative Procedure Act, 5 U.S.C. 553(d), FTA finds good cause for an exception to the requirement for 30-day publication prior to an effective date.

Issued in Washington, DC, under the authority delegated at 49 CFR 1.91.

Therese W. McMillan,
Acting Administrator.

[Docket No. 130717632–4285–02]

**RIN 0648–XE085**

**International Fisheries; Pacific Tuna Fisheries; 2015 Bigeye Tuna Longline Fishery Closure in the Eastern Pacific Ocean**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Temporary rule; closure.

**SUMMARY:** NMFS is temporarily closing the U.S. pelagic longline fishery for bigeye tuna for vessels over 24 meters in overall length in the eastern Pacific Ocean (EPO) through December 31, 2015 because the 2015 catch limit of 500 metric tons is expected to be reached. This action is necessary to prevent the fishery from exceeding the applicable catch limit established by the Inter-American Tropical Tuna Commission (IATTC) in Resolution C–13–01, which governs tuna conservation in the EPO from 2014–2016.

**DATES:** The rule is effective 12 a.m. local time August 12, 2015, through 11:59 p.m. local time December 31, 2015.

**FOR FURTHER INFORMATION CONTACT:**

Taylor Debevec, NMFS West Coast Region, 562–980–4066.

**SUPPLEMENTARY INFORMATION:** The United States is a member of the IATTC, which was established under the Convention for the Establishment of an Inter-American Tropical Tuna Commission signed in 1949 (Convention). The Convention provides an international agreement to ensure the effective international conservation and management of highly migratory species of fish in the IATTC Convention Area. The IATTC Convention Area, as amended by the Antigua Convention, includes the waters of the EPO bounded by the coast of the Americas, the 50° N. and 50° S. parallels, and the 150° W. meridian.

Pelagic longline fishing in the EPO is managed, in part, under the Tuna Conventions Act of 1950 (Act), 16 U.S.C. 951–962. Under the Act, NMFS must publish regulations to carry out recommendations of the IATTC that have been approved by the Department of State (DOS). Regulations governing fishing by U.S. vessels in accordance with the Act appear at 50 CFR part 300, subpart C. These regulations implement
IATTC recommendations for the conservation and management of highly migratory fish resources in the EPO.

In 2013, the IATTC adopted Resolution C–13–01, which establishes an annual catch limit of bigeye tuna for longline vessels over 24 meters. For calendar years 2014, 2015, and 2016, the catch of bigeye tuna by longline gear in the IATTC Convention Area by fishing vessels of the United States that are over 24 meters in overall length is limited to 500 metric tons per year. With the approval of the DOS, NMFS implemented this catch limit by notice-and-comment rulemaking under the Act (79 FR 19487, April 9, 2014, and codified at 50 CFR 300.25).

NMFS, through monitoring the retained catches of bigeye tuna using logbook data submitted by vessel captains and other available information from the longline fisheries in the IATTC Convention Area, has determined that the 2015 catch limit is expected to be reached by August 12, 2015. In accordance with 50 CFR 300.25(b), this Federal Register notice announces that the U.S. longline fishery for bigeye tuna in the IATTC Convention Area will be closed for vessels over 24 meters in overall length starting on August 12, 2015, through the end of the 2015 calendar year. The 2016 fishing year is scheduled to open on January 1, 2016. The bigeye tuna catch limit for longline vessels over 24 meters in overall length will again be 500 metric tons for 2016.

During the closure, a U.S. fishing vessel over 24 meters in overall length may not be used to retain on board, transship, or land bigeye tuna captured by longline gear in the IATTC Convention Area, except as follows:

- Any bigeye tuna already on board a fishing vessel on August 12, 2015, may be retained on board, transshipped, and/or landed, to the extent authorized by applicable laws and regulations, provided all bigeye tuna are landed within 14 days after the effective date of this rule, that is, no later than August 26, 2015.
- In the case of a vessel that has declared to NMFS that the current trip type is shallow-set longlining, the 14-day limit to land all bigeye in the previous paragraph is waived. However, the prohibition on any additional retention of bigeye tuna still applies as of August 12, 2015.

Other prohibitions during the closure include the following:

- Bigeye tuna caught by a United States vessel over 24 meters in overall length with longline gear in the IATTC Convention Area may not be transshipped to a fishing vessel unless that fishing vessel is operated in compliance with a valid permit issued under 50 CFR 660.707 or 665.801.
- A fishing vessel of the United States over 24 meters in overall length, that is not on a declared shallow-set longline trip, may not be used to fish in the Pacific Ocean using longline gear both inside and outside the IATTC Convention Area during the same fishing trip, with the exception of a fishing trip that was already in progress when the prohibitions were put into effect.
- If a vessel over 24 meters in overall length, that is not on a declared shallow-set longline trip, is used to fish in the Pacific Ocean using longline gear outside the IATTC Convention Area, and the vessel enters the IATTC Convention Area at any time during the same fishing trip, the longline gear on the fishing vessel must be stowed in a manner so as not to be readily available for fishing. Specifically, the hooks, branch lines, and floats must be stowed and not available for immediate use, and any power-operated mainline hauler on deck must be covered in such a manner that it is not readily available for use.

Classified

NMFS has determined there is good cause to waive prior notice and opportunity for public comment pursuant to 5 U.S.C. 553(b)(B). This action is based on the best available information and is necessary for the conservation and management of bigeye tuna. Compliance with the notice and comment requirement would be impracticable and contrary to the public interest because NMFS would be unable to ensure that the 2015 bigeye tuna catch limit applicable to longline vessels over 24 meters is not exceeded. The annual catch limit is an important mechanism to ensure that the United States complies with its international obligations in preventing overfishing and managing the fishery at optimum yields. Moreover, NMFS previously solicited, and considered, public comments on the rule that established the catch limit (79 FR 19487, April 9, 2014), including a provision for issuing a notice to close the fishery, if necessary, to prevent exceeding the catch limit. For the same reasons, NMFS has also determined there is good cause to waive the requirement for a 30-day delay in effectiveness under 5 U.S.C. 553(d)(3). This action is required by 50 CFR 300.25(b) and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 951 et seq.

Dated: July 31, 2015.

Jennifer M. Wallace,
Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

50 CFR Part 635

[Docket No. 120328229–4949–02]

RIN 0648–XE079

Atlantic Highly Migratory Species; Atlantic Bluefin Tuna Fisheries

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason quota transfer.

SUMMARY: NMFS is transferring 40 metric tons (mt) of Atlantic bluefin tuna (BFT) quota from the Reserve category to the Harpoon category. With this transfer, the adjusted Harpoon category quota for the 2015 fishing season is 73.4 mt. The 2015 Harpoon category fishery is open until November 15, 2015, or until the Harpoon category quota is reached, whichever comes first. The action is based on consideration of the regulatory determination criteria regarding inseason adjustments, and applies to Atlantic tunas Harpoon category (commercial) permitted vessels.

DATES: Effective July 31, 2015, through November 15, 2015.

FOR FURTHER INFORMATION CONTACT: Sarah McLaughlin or Brad McHale, 978–281–9260.

SUPPLEMENTARY INFORMATION:

Regulations implemented under the authority of the Atlantic Tunas Convention Act (ATCA; 16 U.S.C. 971 et seq.) and the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 et seq.) governing the harvest of BFT by persons and vessels subject to U.S. jurisdiction are found at 50 CFR part 635. Section 635.27 subdivides the U.S. BFT quota recommended by the International Commission for the Conservation of Atlantic Tunas (ICCAT) among the various domestic fishing
