

planning objectives apply to the proposed action/project modification.

Planning Objectives

- Primary Planning objectives: (1) Increase the survival of anadromous fish populations in the Sacramento River, primarily upstream from the Red Bluff Diversion Dam, and (2) increase water supply and water supply reliability for agricultural, municipal and industrial, and environmental purposes to help meet future water demands, with a focus on enlarging Shasta Dam and Reservoir. Action alternatives were formulated to address these primary planning objectives.

- Secondary Planning Objectives. The following actions, operations, or features are included to the extent possible and consistent with the primary planning objectives: (1) Conserve, restore, and enhance ecosystem resources in the Shasta Lake area and along the upper Sacramento River, (2) reduce flood damage along the Sacramento River, (3) develop additional hydropower generation capabilities at Shasta Dam, (4) maintain and increase recreation opportunities at Shasta Lake, and (5) maintain or improve water quality conditions in the Sacramento River downstream from Shasta Dam and in the Sacramento-San Joaquin Delta.

Final Environmental Impact Statement

The FEIS documents a reasonable range of alternatives and evaluates the potential direct, indirect, and cumulative environmental effects of alternative plans. Evaluation of six alternatives is documented in the FEIS, including a No-Action Alternative and five action alternatives. The FEIS displays the potential project-related impacts, including the effects of project construction and operation on the following resource areas: Geology, air quality, hydrology, water quality, noise, hazards and hazardous materials, important agricultural lands, fish, vegetation and wildlife, cultural resources, Indian Trust Assets, socioeconomic, land use, recreation, visual resources, traffic and circulation, utilities, public services, power and energy, environmental justice, and wild and scenic rivers; and identifies the Preferred Alternative, pursuant to the National Environmental Policy Act.

Potential project-related impacts include the construction-related effects of the dam enlargement, reservoir area relocations, and other alternative features; water operations-related effects within the reservoir area (e.g., including additional inundation areas); and associated effects to operations of other

Central Valley Project and State Water Project facilities. Project operations may directly or indirectly affect the resources of the Sacramento River, its tributaries, the San Joaquin River, its tributaries, and the Sacramento-San Joaquin Delta. The FEIS also evaluates potential growth-inducing impacts for the Central Valley Project and State Water Project water service areas. Potential cumulative effects associated with reasonably foreseeable actions are also evaluated for each resource area.
