Cyber Security Business Development Mission to Japan, South Korea, and Taiwan; May 16-24, 2016

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: The United States Department of Commerce, International Trade Administration (ITA), is organizing an Executive-led Cyber-security Business Development Mission to Japan, South Korea and Taiwan.

The purpose of the mission is to introduce U.S. firms and trade associations to East Asia's information and communication technology (ICT) security and critical infrastructure protection markets and to assist U.S. companies to find business partners and

export their products and services to the region. The mission is intended to include representatives from U.S. companies and U.S. trade associations with members that provide cyber-security and critical infrastructure protection products and services. The mission will visit Japan, South Korea and Taiwan where U.S. firms will have access to business development opportunities across East Asia. Participating firms will gain market insights, make industry contacts, solidify business strategies, and advance specific projects, with the goal of increasing U.S. exports of products and services to East Asia. The mission will include customized one-on-one business appointments with pre-screened potential buyers, agents, distributors and joint venture partners; meetings with state and local government officials and industry leaders; and networking events.

The mission will help participating firms and trade associations to gain market insights, make industry contacts, solidify business strategies, and advance specific projects, with the goal of increasing U.S. exports to Japan, South Korea and Taiwan. By participating in an official U.S. industry delegation, rather than traveling to Japan, South Korea and Taiwan on their own, U.S. companies will enhance their ability to secure meetings in those countries and gain greater exposure to the region.
