SUPPLEMENTARY INFORMATION:

I. Abstract

Under the Inventors' Rights Act of 1999, as found in 35 U.S.C. 297 and implemented by 37 CFR part 4, the United States Patent and Trademark Office (USPTO) is required to provide a forum for the publication of complaints concerning invention promoters and responses from the invention promoters to these complaints. An individual may submit a complaint concerning an invention promoter to the USPTO, which will forward the complaint to the invention promoter for response. The complaints and responses will be published and made available to the public on the USPTO Web site. The USPTO does not investigate these complaints or participate in any legal proceedings against invention promoters or promotion firms.

Complaints submitted to the USPTO must (1) identify the name and address of the complainant and the invention promoter or promotion firm; (2) explain the basis for the complaint; and (3) include the signature of the complainant. The identifying information is necessary so that the USPTO can both forward the complaint to the invention promoter or promotion firm as well as notify the complainant that the complaint has been forwarded. Complainants should understand that the complaints will be forwarded to the invention promoter for response and that the complaint and response will be made available to the public as required by the Inventors' Rights Act. If the USPTO does not receive a response from the invention promoter, the complaint will still be published without the response. The USPTO does not accept complaints under this program if the complainant requests confidentiality.

This information collection includes one form, Complaint Regarding Invention Promoter (PTO/SB/2048A), which is used by the public to submit a complaint under this program. This form is available for download from the USPTO Web site. Use of this form is not mandatory, and the complainant may submit their complaint without the form via any of the approved methods of collection as long as the complainant includes the necessary information and the submission is clearly marked as a complaint filed under the Inventors'

Rights Act. There is no associated form for submitting responses to the complaints.

II. Method of Collection

By mail, facsimile, or hand delivery to the USPTO.

III. Data

OMB Number: 0651-0044.

IC Instruments and Forms: The individual instruments in this collection, as well as their associated forms, are listed in the table below.

Type of Review: Revision of a Previously Existing Information Collection.

Affected Public: Individuals or households; businesses or other for-profits; and not-for-profit institutions.

Estimated Number of Respondents: 50 responses per year. Of this total, the USPTO expects that 100% will be submitted on paper.

Estimated Time per Response: The USPTO estimates that it will take the public approximately 15 minutes (0.25 hours) to gather the necessary information, prepare the form, and submit a complaint to the USPTO and approximately 30 minutes (0.5 hours) for an invention promoter or promotion firm to prepare and submit a response to a complaint.

Estimated Total Annual Hour Burden: 17.5 hours.

Estimated Total Annual Cost Burden (Hourly): \$3,026.25. The USPTO expects that complaints will be prepared by paraprofessionals or independent inventors. Using the average of the paraprofessional rate of \$125 per hour and the estimated rate of \$30 per hour for independent inventors, the USPTO estimates that the average rate for preparing the complaints will be approximately \$77.50 per hour.

The USPTO expects that the responses to the complaints will be prepared by attorneys or invention promoters. Using the average of the professional rate of \$389 per hour for attorneys in private firms and the estimated rate of \$100 per hour for invention promoters, the USPTO estimates that the average rate for preparing the responses to the complaints will be approximately \$244.50 per hour. The time per response, estimated annual responses, and estimated annual hour burden associated with each instrument in this information collection is shown in the table below.
