SUPPLEMENTARY INFORMATION:

I. Background: The Office of Workers' Compensation Programs (OWCP) is the agency responsible for administration of the Federal Employees' Compensation Act (FECA), 5 U.S.C. 8101 *et seq.*, the Black Lung Benefits Act (BLBA), 30 U.S.C. 901 *et seq.*, and the Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA), 42 U.S.C. 7384 *et seq.* All three of these statutes require that OWCP pay for covered medical treatment provided to beneficiaries; this medical treatment can include medicinal drugs dispensed by pharmacies. In order to determine whether amounts billed for drugs are appropriate, OWCP must receive the required data elements, including the name of the patient/beneficiary, the National Drug Code (NDC) number of the drugs prescribed, the quantity provided, the prescription number and the date the prescription was filled. The regulations implementing these statutes require the collection of information needed to enable OWCP to determine if bills for drugs submitted directly by pharmacies, or reimbursement requests submitted by claimants, should be paid. There is no standardized paper form for submission of the billing information collected in this Information Collection Request (ICR). Over the past several years, almost all pharmacy bills submitted to OWCP have been submitted electronically using one of the industry-wide standard formats for the electronic transmission of billing data through nationwide data clearinghouses devised by the National Council for Prescription Drug Programs (NCPDP). None of the electronic billing formats have been designed by or provided by OWCP; they are billing formats commonly accepted by other Federal programs and in the private health insurance industry for drugs. Nonetheless, the three programs (FECA, BLBA and EEOICPA) provide instructions for the submission of necessary pharmacy bill data elements in provider manuals distributed or made available to all pharmacies enrolled in the programs. This information collection is currently approved for use through January 31, 2016.

II. Review Focus: The Department of Labor is particularly interested in comments which:

- * Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

1. *Title:* Independent Researcher Listing Application

OMB number: 3095–0054.

Agency form number: NA Form 14115.

Type of review: Regular.

Affected public: Individuals or households.

Estimated number of respondents: 458.

Estimated time per response: 10 minutes.

Frequency of response: On occasion.

Estimated total annual burden hours: 76.

Abstract: To accommodate both the public and NARA staff, the Customer Services Division (RD–C1) of the National Archives maintains a listing of independent researchers for the public. We make use of various lists of independent researchers who perform freelance research for hire in the Washington, DC, area and send them upon request to researchers who cannot travel to the metropolitan area to conduct their own research. All interested independent researchers provide their contact information via this form. Collecting contact and other key information from each independent researcher and providing such information to the public when deemed appropriate will only increase business. This form is not a burden in any way to any independent researcher who voluntarily submits a completed form. Inclusion on the list will not be viewed or advertised as an endorsement by the National Archives and Records Administration (NARA). The listing is compiled and disseminated as a service to the public.

SUPPLEMENTARY INFORMATION:

Title Of Collection: Grantee Reporting Requirements for the Graduate Research Fellowship Program.

OMB Number: 3145–0223.

Expiration Date of Approval: December 31, 2015.

Type of Request: Intent to seek approval to renew an information collection.

Abstract

Proposed Project: The purpose of the NSF Graduate Research Fellowship Program is to help ensure the vitality and diversity of the scientific and engineering workforce of the United States. The program recognizes and supports outstanding graduate students who are pursuing research-based master's and doctoral degrees in science, technology, engineering, and mathematics (STEM) and in STEM education. The GRFP provides three years of support, to be used during a five-year fellowship period, for the graduate education of individuals who have demonstrated their potential for significant research achievements in STEM and STEM education.

The Graduate Research Fellowship Program uses several sources of information in assessing and documenting program performance and impact. These sources include reports from program evaluation, the GRFP Committee of Visitors, and data compiled from the applications. In addition, GRFP Fellows submit annual activity reports to NSF.

The GRFP Completion report is proposed as a continuing component of the annual reporting requirement for the program. This report, submitted by the

GRFP Institution, certifies the completion status of Fellows at the institution (e.g., in progress, completed, graduated, transferred, or withdrawn). The existing Completion Report, Grants Roster Report, and the Program Expense Report comprise the GRFP Annual Reporting requirements from the Grantee GRFP institution. Through submission of the Completion Report to NSF GRFP institutions certify the current status of all GRFP Fellows at the institution as either: In Progress, Graduated, Transferred, or Withdrawn. For Graduate Fellows with Graduated status, the graduation date is a required reporting element. Collection of this information allows the program to obtain information on the current status of Fellows, the number and/or percentage of Graduate Fellowship recipients who complete a science or engineering graduate degree, and an estimate of time to degree completion. The report must be certified and submitted by the institution's designated Coordinating Official (CO) annually.

Use of the Information: The completion report data provides NSF with accurate Fellow information regarding completion of the Fellows' graduate programs. The data is used by NSF in its assessment of the impact of its investments in the GRFP, and informs its program management.

Estimate of Burden: Overall average time will be 15 minutes per Fellow (8,250 Fellows) for a total of 2,063 hours for all institutions with Fellows. An estimate for institutions with 12 or fewer Fellows will be 1 hour, institutions with 12–48 fellows will be 4 hours, and institutions over 48 Fellows will be 10 hours.

Respondents: Academic institutions with NSF Graduate Fellows (GRFP Institutions).

Estimated Number of Responses per Report: One from each of the 271 current GRFP institutions.

Comments: Comments are invited on (a) whether the collection of information is necessary for the proper performance and function of the National Science Foundation, including whether the information shall be useful; (b) the accuracy of NSF's estimate of the burden of the proposed collection of information; (c) ways to enhance the utility and clarity of the information on respondents, including through the use of automated collection techniques or other forms of information technology; (d) ways to minimize the burden of the collection of information on those who are to respond and (e) the usefulness of the data to institutions.
