

citizens. Five commenters supported the action and five were opposed. The commenters who were opposed to the action raised issues related to the potential effects the release of *S. galinae* would have on human and environmental health and post-release monitoring methods. APHIS has provided responses to specific concerns raised by the comments in an appendix to the final EA.

In this document, we are advising the public of our finding of no significant impact (FONSI) regarding the release of *S. galinae* into the continental United States for use as a biological control agent for EAB. The finding, which is based on the final EA, reflects our determination that release of this biological control agent will not have a significant impact on the quality of the human environment.

The final EA and FONSI may be viewed on Regulations.gov Web site (see footnote 1). Copies of the EA and FONSI are also available for public inspection at USDA, Room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect copies are requested to call ahead to (202) 799-7039 to facilitate entry into the reading room. In addition, copies may be obtained by calling or writing to the individual listed under **FOR FURTHER INFORMATION CONTACT**.

The EA and FONSI have been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*); (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500-1508); (3) USDA regulations implementing NEPA (7 CFR part 1b); and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

Done in Washington, DC, this 17th day of August 2015.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Automated Export System (AES) or successor system, is the instrument used for collecting export trade information. The data collected from this source is compiled by the U.S. Census Bureau and functions as the basis for the official U.S. export trade statistics. These statistics are used to determine the balance of international trade and are also designated for use as a principal economic indicator. Title 13, United States Code (U.S.C.), Chapter 9, Section 301 authorizes the Census Bureau to collect, compile, publish, and require the electronic filing of export data. Section 302 of Title 13, U.S.C., authorizes the Secretary of Commerce to publish regulations for the collection, publication, confidentiality, and disclosure of data collected pursuant to Chapter 9. Title 15, Code of Federal Regulations (CFR), Part 30, contains these regulatory provisions, and is known as the Foreign Trade Regulations (FTR). These data collected are used in the development of U.S. Government policies that affect the economy. These data also enable U.S. businesses to develop practical export marketing strategies as well as provide a means for the assessment of the impact of exports on the domestic economy. These data collected from the AES record are also used for export control purposes under Title 50, U.S.C., Export Administration Act, to detect and prevent the export of certain items by unauthorized parties or to unauthorized destinations or end users.

The FTR was recently amended on February 9, 2015, through the issuance of a Final Rule, "Clarification on Uses of Electronic Export Information," to provide clarity on the confidentiality provisions of the Electronic Export Information (EEI) and to facilitate the legitimate sharing of export data consistent with the goals for the International Trade Data System (ITDS). However, these changes did not impact the reporting burden imposed upon the export trade community.

Currently, the Census Bureau is drafting a Notice of Proposed Rulemaking (NPR) to amend the FTR with new export reporting requirements. The proposed changes include the addition of two new data elements in the AES and clarification to existing reporting requirements. The proposed

fields are not mandatory data elements and will only be required if a shipment meets a specific reporting requirement.

The proposed data elements are an Original Internal Transaction Number (ITN) field and a New or Used Electronics indicator field. The Original ITN field will be an optional field that may be utilized if the filer has to create an additional AES record for a shipment that was previously filed. Adding the Original ITN field will assist the export trade community and enforcement agencies in identifying that a filer completed the mandatory filing requirements for the original shipment. In doing so, this may decrease the issuance of unnecessary penalties for these types of shipments. Because this data element is optional and only applies to a small percentage of shipments, it will have a minimal impact on response burden.

The proposed New or Used Electronics indicator field will be used to improve information on trade flows and the disposal of used electronics. This information will be collected from the trade community for those who export electronics, in order to better understand the quantity and destinations of used electronics being exported. This field is being added to ensure compliance with Executive Order 13693, Planning for Federal Sustainability in the Next Decade, signed on March 19, 2015. The goal of the Executive Order is to employ environmentally sound practices with respect to Federal agency's disposal of all excess or surplus electronic products, to reduce the likelihood of negative impacts to the health and environment in developing countries. Adding the New or Used Electronics indicator will not contribute significantly to response burden because it is optional and is a check box that only applies to shipments of electronics.

The draft NPR also includes language to address the implementation of the ITDS in compliance with the Executive Order 13659, *Streamlining the Export/Import Process for America's Businesses*. The ITDS is an electronic information exchange capability, or "single window," through which businesses will transmit data required by participating agencies for the importation or exportation of cargo.

Lastly, the draft NPR also includes language to clarify the reporting requirements for items such as Department of Treasury, Office of Foreign Assets Control (OFAC), specific or general licenses and split shipments. Unlike other export licenses, general and specific licenses issued by OFAC do not require a specific value or quantity
