

opportunity to resubmit the application. Applicants who are not selected also will be notified by email.

V. Advantages of Participation

During the period of participation in the test, which the CPSC refers to as the “eFiling Alpha Pilot,” test participants can expect the following:

- Opportunity to work directly with CBP and CPSC in pre-implementation stage of e-Filing targeting/enforcement data;
- Ability to provide feedback and experience that will inform ultimate e-Filing requirements;
- Ability to trouble-shoot systems and procedures;
- Reduction of product safety tests on goods imported;
- In the event of an examination, shipments will be conditionally released to the importer’s premises for examination;
- In the event of testing, samples will receive “front of the line testing” from CPSC laboratories; and
- If destruction of products is required, participants may be allowed to destroy products in lieu of redelivering the product to CBP for destruction.

VI. Test Duration

Upon selection into the test, test participants will be expected to begin work promptly with CBP and CPSC to define and refine requirements. Once the test is operational, the test is expected to run for approximately six months or until concluded or extended by the issuance of a **Federal Register** notice announcing the extension or conclusion of this test.

VII. Paperwork Reduction Act

For this initial test of electronic filing of targeting/enforcement data, CPSC will accept fewer than 10 participants, and the test will be exempt from the requirements of the Paperwork Reduction Act of 1995. If CPSC decides to participate in a larger-scale test, we will provide notice and seek an OMB control number specifically for such test.

VIII. Confidentiality

All data submitted and entered into ACE is subject to the Trade Secrets Act (18 U.S.C. 1905) and is considered confidential, except to the extent as otherwise provided by law. As stated in previous notices, participation in this or any of the previous ACE tests is not confidential and upon a written Freedom of Information Act (“FOIA”) request, a name(s) of an approved participant(s) will be disclosed by CPSC or CBP in accordance with 5 U.S.C. 552.

Department of the Army, Corps of Engineers

Availability of a Draft Feasibility Study With Integrated Environmental Impact Statement, Ala Wai Canal Project, Oahu, HI

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DOD.

ACTION: Notice of Availability.

SUMMARY: The U.S. Army Corps of Engineers (USACE) announces the availability of a Public Review Draft Feasibility Study with Integrated Environmental Impact Statement (EIS), for the Ala Wai Canal Project, Oahu, Hawaii. To better inform potential commenters, a public meeting is scheduled on September 30, 2015 at Washington Middle School in Honolulu, Hawaii. The Draft Feasibility Study/EIS evaluates alternatives to manage flood risk within the Ala Wai watershed, which includes the neighborhoods of Makiki, Manoa, Palolo, Kapahulu, Moiliili, McCully, and Waikiki. It also documents the existing condition of environmental resources in areas considered for locating flood risk management features and potential impacts on those resources that could result from implementing each alternative. The State of Hawaii, Department of Land and Natural Resources is the non-Federal sponsor and the proposing agency for compliance with the Hawaii law on Environmental Impact Statements.

DATES: All written comments must be postmarked on or before October 7, 2015.

ADDRESSES: Written comments may be submitted to the Ala Wai Canal Project, U.S. Army Corps of Engineers, Honolulu District, ATTN: Derek Chow, Chief, Civil and Public Works Branch (CEPOH-PP-C), Building 230, Fort Shafter, HI 96858-5440 or via email to AlaWaiCanalProject@USACE.Army.mil. Oral and written comments may also be submitted at the public meeting described in the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: Mr. Derek Chow, U.S. Army Corps of Engineers, Honolulu District, 808-835-4026 or via email at Derek.J.Chow@usace.army.mil.

SUPPLEMENTARY INFORMATION: Before including your address, phone number, email address, or other personal identifying information in your comment, be advised that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask in your comment to withhold from public review your personal identifying information, we cannot guarantee that we will be able to do so.

Proposed Action. The Ala Wai Canal Project, Oahu, Hawaii feasibility study is a single-purpose flood risk management project to reduce riverine flood risks to property and life safety in the Ala Wai Watershed. The Ala Wai Watershed is located on the southeastern side of the island of Oahu, Hawaii. The watershed is 19 square miles and encompasses three sub-watersheds of Makiki, Manoa and Palolo Streams, which all drain into the Ala Wai Canal. The study area includes the most densely populated watershed in Hawaii with approximately 200,000 residents in the developed areas. In addition, Waikiki supports approximately 79,000 visitors on a daily basis.

This study was authorized under Section 209 of the Flood Control Act of 1962 (Pub. L. 87-874), a general study authority that authorizes surveys in harbors and rivers in Hawaii “with a view to determining the advisability of improvements in the interest of navigation, flood control, hydroelectric power development, water supply, and other beneficial uses, and related land resources.”

Alternatives. The Draft Feasibility Study/EIS considers a full range of nonstructural and structural flood risk management alternatives that would meet the proposed action's purpose and need and incorporate measures to avoid and minimize impacts to native aquatic species, stream habitat, and other resources. In response to identified flood-related problems and opportunities, a range of alternatives were evaluated through an iterative screening and formulation process, resulting in identification of a tentatively selected plan.

The Tentatively Selected Plan (TSP) is the National Economic Development (NED) Plan and consists of the following components: improvements to the flood warning system, 6 in-stream debris and detention basins in the upper reaches of the watershed, 1 stand-alone debris catchment feature, 3 multi-purpose detention basins in open space areas through the developed watershed, floodwalls along portions of the Ala Wai Canal, mitigation measures, and 3 associated pump stations to maintain internal drainage. Canal floodwalls would extend approximately 1.7 miles along the left (*makai*) bank and
