Title of Collection: ED School Climate Surveys (EDSCLS) Benchmark Study 2016.

OMB Control Number: 1850—NEW.

Type of Review: A new information collection.

Respondents/Affected Public: Voluntary.

Total Estimated Number of Annual Responses: 358,649.

Total Estimated Number of Annual Burden Hours: 190,665.

Abstract: The ED School Climate Surveys (EDSCLS) are a suite of survey instruments being developed for schools, districts, and states by the U.S. Department of Education's (ED) National Center for Education Statistics (NCES). This national effort extends current activities that measure school climate, including the state-level efforts of the Safe and Supportive Schools (S3) grantees, which were awarded funds in 2010 by the ED's Office of Safe and Healthy Students (OSHS) to improve

school climate. Through the EDSCLS, schools nationwide will have access to survey instruments and a survey platform that will allow for the collection and reporting of school climate data across stakeholders at the local level. The surveys can be used to produce school-, district-, and state-level scores on various indicators of school climate from the perspectives of students, teachers, noninstructional school staff and principals, and parents and guardians. This request is to conduct a national EDSCLS benchmark study, collecting data from a nationally representative sample of schools across the United States, to create a national comparison point for users of EDSCLS. A nationally representative sample of 500 schools serving students in grades 5–12 will be sampled to participate in the national benchmark study in spring 2016. The data collected from the sampled schools will be used to produce national school climate scores on the various topics covered by EDSCLS, which will be released in the updated EDSCLS platform and provide a basis for comparison between data collected by schools and school systems and the national school climate.
