#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

The Department of Commerce is responsible for the Baldrige Performance Excellence Program (BPEP) and the Malcolm Baldrige National Quality Award (MBNQA), the nation's highest award for organizational performance excellence. Directly associated with this award is the Board of Examiners, an integral volunteer workforce for BPEP. NIST manages BPEP. An applicant organization for the MBNQA is required to perform two

steps: (1) The applicant organization self-certifies that it meets eligibility requirements with an eligibility form; and (2) the applicant organization prepares and completes an application package. BPEP will assist with or offer advice on any questions or issues that the applicant may have concerning the eligibility or application processes; this includes BPEP staff manning a hotline during the week and on weekends for organizations to call or email. With the help of the Board of Examiners, BPEP will use the eligibility forms and application package to assess and provide feedback on the applicant's performance excellence practices. These practices could lead to a MBNQA awarded by the President of the United States or his delegate.

Per Public Law 100-107 (Malcolm Baldrige National Quality Improvement Act of 1987), the MBNQA helps to stimulate American companies to improve quality and productivity for the pride of recognition while obtaining a competitive edge through increased profits; recognizes the achievements of those companies that improve the quality of their goods and services and provide an example to others; establishes guidelines and criteria that can be used by business, industrial, governmental, and other organizations in evaluating their own quality improvement efforts; and provides specific guidance for other American organizations that wish to learn how to manage for high quality by making available detailed information on how winning organizations were able to change their cultures and achieve eminence.

The application to be a member of the Board of Examiners is a one-step, secure, online process. Each year, BPEP recruits highly skilled experts in the fields of manufacturing, service, small business, health care, education, and nonprofit, the six Award eligibility categories, to evaluate the applications that BPEP receives. Examiners serve for a one-year term; participation on the board is entirely voluntary. Examiners receive three- to four-days of free on-site training (depending on experience level); this training has been nationally recognized for two consecutive years as part of the number-one leadership development program in the military/government category of the Leadership 500 Awards, sponsored by HR.com.

BPEP's mission to improve the competitiveness and performance of U.S. organizations for the benefit of all U.S. residents.

##### II. Method of Collection

MBNQA applicant organizations must comply in writing according to the Eligibility Certification Form and Baldrige Award Application Form available at [http://www.nist.gov/baldrige/enter/how\\_to\\_apply.cfm](http://www.nist.gov/baldrige/enter/how_to_apply.cfm). Information on the application for the Board of Examiners can be found at <http://www.nist.gov/baldrige/examiners/index.cfm>. BPEP will electronically send a unique user ID and password (separate emails) on how applicants to the Board of Examiners can apply to the secure system.

#### Determination of Overfishing or an Overfished Condition

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice.

**SUMMARY:** This action serves as a notice that NMFS, on behalf of the Secretary of Commerce (Secretary), has found that the following four stocks of Pacific salmon are subject to overfishing: Chinook salmon—Columbia River Basin: Upper River Summer; Chinook salmon—Washington Coast: Willapa Bay Fall Natural; Chinook salmon—Washington Coast: Grays Harbor Fall; and Coho salmon—Washington Coast: Hoh. In addition, NMFS has found that the North Pacific swordfish stock in the Eastern Pacific Ocean, which is jointly managed by the Pacific Fishery Management Council and the Western Pacific Fishery Management Council, is subject to overfishing. NMFS, on behalf of the Secretary, notifies the appropriate fishery management council (Council) whenever it determines that overfishing is occurring, a stock is in an overfished condition, a stock is approaching an overfished condition, or when a rebuilding plan has not resulted in adequate progress toward ending overfishing and rebuilding affected fish stocks. None of these stocks is in an overfished condition.

**FOR FURTHER INFORMATION CONTACT:** Regina Spallone, (301) 427-8568.

**SUPPLEMENTARY INFORMATION:** Pursuant to sections 304(e)(2) and (e)(7) of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), 16 U.S.C. 1854(e)(2) and (e)(7), and implementing regulations at 50 CFR 600.310(e)(2), NMFS, on behalf of the Secretary, must

notify Councils whenever it determines that a stock or stock complex is overfished or approaching an overfished condition; or if an existing rebuilding plan has not ended overfishing or resulted in adequate rebuilding progress. NMFS also notifies Councils when it determines a stock or stock complex is subject to overfishing. Section 304(e)(2) further requires NMFS to publish these notices in the **Federal Register**.

NMFS has determined that four stocks of Pacific salmon are now subject to overfishing:

1. Chinook salmon—Columbia River Basin: Upper River Summer;
2. Chinook salmon—Washington Coast: Willapa Bay Fall Natural;
3. Chinook salmon— Washington Coast: Grays Harbor Fall; and
4. Coho salmon—Washington Coast: Hoh.

The Pacific Fishery Management Council has been informed that they must take action to end overfishing immediately on these stocks.

In addition, NMFS has determined that the North Pacific swordfish stock in the Eastern Pacific Ocean (EPO) is subject to overfishing and is not in an overfished condition. This determination was based on an assessment conducted by the International Scientific Committee for Tuna and Tuna-like Species in the North Pacific Ocean (ISC), in conjunction with NOAA scientists. NMFS has confirmed that section 304(i) of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) applies because (1) the overfishing condition of swordfish is due largely to excessive international fishing pressure, and (2) there are no management measures (or efficiency measures) to end overfishing under an international agreement to which the U.S. is a party. NMFS has informed the Western Pacific Fishery Management Council and the Pacific Fishery Management Council of their obligations for international and domestic management under Magnuson-Stevens Act sections 304(i) and 304(i)(2) to address international and domestic impacts, respectively. The Councils must develop domestic regulations to address the relative impact of the domestic fishing fleet on the stock, and develop recommendations to the Secretary of State and Congress for international actions to end overfishing on North Pacific swordfish EPO.
