Drug Enforcement Administration

[Docket No. DEA-418F]

Final Adjusted Aggregate Production Quotas for Schedule I and II Controlled Substances and Assessment of Annual Needs for the List I Chemicals Ephedrine, Pseudoephedrine, and Phenylpropanolamine for 2015

AGENCY: Drug Enforcement Administration, Department of Justice.

ACTION: Final order.

SUMMARY: This final order establishes the final adjusted 2015 aggregate production quotas for controlled substances in schedules I and II of the Controlled Substances Act and the assessment of annual needs for the list I chemicals ephedrine, pseudoephedrine, and phenylpropanolamine.

DATES: This order is effective September 16, 2015.

FOR FURTHER INFORMATION CONTACT: John R. Scherbenske, Office of Diversion Control, Drug Enforcement Administration, 8701 Morrisette Drive, Springfield, Virginia 22152; Telephone: (202) 598-6812.

SUPPLEMENTARY INFORMATION:

Legal Authority

The Drug Enforcement Administration (DEA) implements and enforces titles II and III of the Comprehensive Drug Abuse Prevention and Control Act of 1970, as amended. 21 U.S.C. 801-971. Titles II and III are referred to as the "Controlled Substances Act" and the "Controlled Substances Import and Export Act," respectively, and are collectively referred to as the "Controlled Substances Act" or the "CSA" for the purposes of this action. The DEA publishes the implementing regulations for these statutes in title 21 of the Code of Federal Regulations (CFR), chapter II. The CSA and its implementing regulations are designed to prevent, detect, and eliminate the diversion of controlled substances and listed chemicals into the illicit market while providing for the legitimate medical, scientific, research, and industrial needs of the United States. Controlled

substances have the potential for abuse and dependence and are controlled to protect the public health and safety.

Section 306 of the CSA (21 U.S.C. 826) requires the Attorney General to establish aggregate production quotas for each basic class of controlled substance listed in schedules I and II and for ephedrine, pseudoephedrine, and phenylpropanolamine. This responsibility has been delegated to the Administrator of the DEA. 28 CFR 0.100(b).

Background

The DEA established the initial 2015 aggregate production quotas for controlled substances in schedules I and II and the assessment of annual needs for the list I chemicals ephedrine, pseudoephedrine, and phenylpropanolamine on September 8, 2014. 79 FR 53216. That notice stated that the DEA could adjust, as needed, the established aggregate production quotas and assessment of annual needs in accordance with 21 CFR 1303.13 and 21 CFR 1315.13. The proposed adjusted 2015 aggregate production quotas for controlled substances in schedules I and II and assessment of annual needs for the list I chemicals ephedrine, pseudoephedrine, and phenylpropanolamine were subsequently published in the **Federal Register** on July 8, 2015, 80 FR 39156, in consideration of the outlined criteria. All interested persons were invited to comment on or object to the proposed adjusted 2015 aggregate production quotas and assessment of annual needs on or before August 7, 2015.

Analysis for Final Adjusted 2015 Aggregate Production Quotas and Assessment of Annual Needs

Consideration has been given to the criteria outlined in the July 8, 2015, notice of proposed adjusted aggregate production quotas and assessment of annual needs, 80 FR 39156, in accordance with 21 CFR 1303.13 and 21 CFR 1315.13. Five companies submitted timely comments regarding twelve schedule I and II controlled substances. These comments suggested that the proposed adjusted aggregate production quotas for codeine (for sale), gamma hydroxybutyric acid, hydrocodone (for sale), methadone, methadone intermediate, methylphenidate, morphine (for conversion), oripavine, oxycodone (for sale), oxymorphone (for conversion), and oxymorphone (for sale) were insufficient to provide for the estimated medical, scientific, research, and industrial needs of the United States, for export requirements, and for the

establishment and maintenance of reserve stocks. The DEA did not receive any comments related to the proposal not to adjust the 2015 assessment of annual needs for ephedrine, pseudoephedrine, and phenylpropanolamine.

In accordance with 21 CFR 1303.13, the DEA has taken into consideration the above comments along with the relevant 2014 year-end inventories, initial 2015 manufacturing and import quotas, 2015 export requirements, actual and projected 2015 sales, research and product development requirements, and the additional quota applications received. Upon consideration of the above, the Administrator determined that the proposed adjusted 2015 aggregate production quotas for dihydroetorphine, ethylmorphine, etorphine HCl, racemethorphan, racemorphane, methylphenidate, and oxycodone (for sale) required additional consideration and hereby further adjusts the proposed 2015 aggregate production quotas for these substances. Regarding codeine (for sale), fentanyl, gamma hydroxybutyric acid, hydrocodone (for sale), methadone, methadone intermediate, morphine (for conversion), oripavine, oxymorphone (for conversion), and oxymorphone (for sale) the Administrator hereby determines that the proposed adjusted 2015 aggregate production quotas for these substances as published in the **Federal Register** on July 8, 2015, 80 FR 39156, are sufficient to meet the current 2015 estimated medical, scientific, research, and industrial needs of the United States and to provide for adequate reserve stock.

As described in the previously published notice establishing the 2015 aggregate production quotas and assessment of annual needs, the DEA has specifically considered that inventory allowances granted to individual manufacturers may not always result in the availability of sufficient quantities to maintain an adequate reserve stock pursuant to 21 U.S.C. 826(a), as intended. *See* 21 CFR 1303.24. This would be concerning if a natural disaster or other unforeseen event resulted in substantial disruption to the amount of controlled substances available to provide for legitimate public need. As such, the DEA included in all schedule II aggregate production quotas, and certain schedule I aggregate production quotas, an additional 25% of the estimated medical, scientific, and research needs as part of the amount necessary to ensure the establishment and maintenance of reserve stocks. The final established aggregate production quotas will reflect these included
