Clinic, UPMC Presbyterian Shadyside, and Vanderbilt University.

Aggregate amount of Non-Competitive Awards: \$8,097,427.
CFDA Number: 93.918

Authority: Sections 2651–2667 of the Public Health Service Act (42 U.S.C. 300ff–51–67) and section 2693 of the Public Health Service Act, as amended by the Ryan White HIV/AIDS Treatment Extension Act of 2009 (Pub. L. 111–87).

Justification: The purpose of the RWHAP Part C EISEGA Program is to provide HIV primary care in the outpatient setting. Grantees provide a comprehensive continuum of outpatient HIV primary care services in the designated service area including: (1) Targeted HIV counseling, testing, and referral; (2) medical evaluation and clinical care; (3) other primary care services; and (4) referrals to other health services. Identifying people infected with HIV and linking them to HIV primary care with initiation and long-term maintenance of life-saving antiretroviral treatment (ART) are important public health steps toward the elimination of HIV in the United States. The continuum of interventions that begins with outreach and testing and concludes with HIV viral load suppression is generally referred to as the HIV Care Continuum or the Care Treatment Cascade. The HIV Care Continuum includes the diagnosis of HIV, linkage to HIV medical care, lifelong retention in HIV medical care, appropriate prescription of ART, and ultimately HIV viral load suppression.
