SUPPLEMENTARY INFORMATION:
I. Overview: Pursuant to 49 U.S.C. 30118(d) and 30120(h) (see implementing rule at 49 CFR part 556), PACCAR submitted a petition for an exemption from the notification and remedy requirements of 49 U.S.C. Chapter 301 on the basis that this noncompliance is inconsequential to motor vehicle safety.
This notice of receipt of PACCAR’s petition is published under 49 U.S.C. 30118 and 30120 and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.
III. Noncompliance: PACCAR explains that due to a programming error in the cab controller software in the subject trucks, the turn signal pilot indicator located on the instrument panel, flashes twice as fast as the turn signal. Therefore, they do not meet the requirements of paragraph S9.3.2 of FMVSS No. 108.
IV. Rule Text: Paragraph S9.3.2 of FMVSS No. 108 requires in pertinent part:
S9.3.2 The indicator must consist of one or more lights flashing at the same frequency as the turn signal lamps.
V. Summary of PACCAR’s Position: PACCAR stated its belief that the subject noncompliance is inconsequential to motor vehicle safety. PACCAR states that the purpose of the turn signal pilot indicator is to assure that the vehicle operator can determine whether the turn signal system is activated. Thus, PACCAR believes that the pilot indicators in the subject trucks fully accomplishes that purpose; i.e., they flash when the turn signal is activated, and they cease flashing when the turn signal is deactivated (either manually or automatically).
PACCAR reviewed the agency’s decisions on petitions for inconsequentiality in connection with various noncompliances with turn signal requirements. While PACCAR did not find any prior decisions that are similar to this noncompliance, PACCAR believes that NHTSA has granted previous petitions in connection with turn signal noncompliances that carried potentially greater safety risks.
PACCAR is not aware of any crashes or injuries associated with the noncompliance and it has not received any consumer complaints or warranty claims related to this issue.
PACCAR additionally informed NHTSA that after the noncompliance was discovered, all production of the noncompliant trucks in PACCAR’s possession was put on hold until the software error can be corrected.
In summation, PACCAR believes that the described noncompliance of the subject trucks is inconsequential to motor vehicle safety, and that its petition, to exempt PACCAR from providing recall notification of noncompliance as required by 49 U.S.C. 30118 and remedying the recall noncompliance as required by 49 U.S.C. 30120 should be granted.
NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the duties found in sections 30118 and 30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the defect or noncompliance. Therefore, any decision on this petition only applies to the subject trucks that PACCAR no longer controlled at the time it determined that the noncompliance
