

draft-eis. On August 28, 2015, DOE announced public hearings in October 2015 to receive comments on the Draft EIS in the **Federal Register** (80 FR 52268). On August 31, 2015, DOE received an amendment to the July 1, 2013, Northern Pass Transmission Line Project Presidential permit amended application. The August 31, 2015 amendment and related exhibits are available on the Northern Pass EIS Web site at <http://www.northernpasseis.us/library/documents/>.

The August 31, 2015 application amendment changed the proposed transmission line route by adding three miles of buried transmission line adjacent to a road not previously analyzed, added two new transition stations (one in Bridgewater and one in Bethlehem; both would transition the transmission line between aboveground and buried) of approximately one acre each, and increased the amount of proposed buried transmission line from approximately 8 miles to approximately 60 miles. In addition, the amendment proposed a minor shift (less than 100 feet) in the international border crossing location, changed the project size from 1,200 MW to 1,000 MW with a potential transfer capability of 1,090 MW and included other design changes (e.g., change in converter technology and type of cable).

Issued in Washington, DC, on September 24, 2015.

Meghan Conklin,

Deputy Assistant Secretary, National Electricity Delivery Division, Office of Electricity Delivery and Energy Reliability, U.S. Department of Energy.
