

Regulations (10 CFR). These results may also be used for future seismic hazard evaluations for existing nuclear power reactors.

The NRC has prepared an EA to evaluate the potential environmental impacts that may arise as a result of this research project in accordance with the requirements of 10 CFR part 51, the NRC's regulations that implement Section 102(2) of the National Environmental Policy Act of 1969, as amended. Based on the EA, and in accordance with 10 CFR 51.31(a), the NRC has concluded that a FONSI is appropriate. Field work for this project will commence following publication of this Notice.

II. EA Summary

The NRC has prepared the EA to evaluate the potential environmental impacts of the field work to be performed along select river segments for this project. In accordance with Section 7 of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*), the NRC staff requested informal consultation with the United States Fish and Wildlife Service. No concerns were identified for Federally listed species or designated critical habitat. This project is temporary, minimally invasive, and will occur outside the critical nesting times for migratory birds. Further, researchers will avoid mussel beds and active nests, and will minimize disturbance to vegetation.

Similarly, the NRC determined that there will be no adverse effects to any historic or cultural resources that may be located in the paleoliquefaction study's area of potential effects within the states of Arkansas, Missouri and Mississippi. The Arkansas, Mississippi, and Missouri State Historic Preservation Officers have concurred with this finding.

Finally, the NRC has determined that there will be no significant impacts to any other resource areas (*e.g.*, surface water, groundwater, air quality) as a result of the proposed field work.

III. Finding of No Significant Impact

On the basis of the EA and as further described in the FONSI, the NRC has concluded that there are no significant environmental impacts from the proposed field work and has determined not to prepare an environmental impact statement.

Dated at Rockville, Maryland, this 5th day of October 2015.

For the Nuclear Regulatory Commission.

Chief, Structural, Geotechnical, and Seismic Engineering Branch, Division of Engineering, Office of Nuclear Regulatory Research.
