Abstract: The 1990 CAA Amendments added section 112(r) to provide for the prevention and mitigation of accidental releases. Section 112(r) mandates that EPA promulgate a list of "regulated substances" with threshold quantities and establish procedures for the addition and deletion of substances from the list of regulated substances. Processes at stationary sources that contain more than a threshold quantity of a regulated substance are subject to accidental release prevention regulations promulgated under CAA section 112(r)(7). These two rules are codified as 40 CFR part 68. Part 68 requires that sources with more than a threshold quantity of a regulated substance in a process develop and implement a risk management program and submit a risk management plan to EPA. The compliance schedule for the Part 68 requirements, established by rule on June 20, 1996, requires the implementation of the source risk management programs and the submission of initial Risk Management Plans (RMPs) by June 21, 1999, and at least every five years after the initial submission. Sources must resubmit earlier than their next five-year deadline if they undergo certain changes to their covered processes as specified in Part 68. Therefore, after the initial submission, some sources re-submitted their RMPs prior to the next 5-year deadline because they had process changes that required an earlier update. These sources were then assigned a new five-year resubmission deadline based on the date of their revised plan submission. Most covered sources had no significant changes to their covered processes and therefore resubmitted their updated RMP on June 21, 2004. This same pattern continued through

the next two submission cycles—some sources updated and resubmitted their RMP prior to their next five-year deadline and were assigned a new (off-cycle) five-year deadline, but a majority of sources submitted their updated RMP on or near the next scheduled five-year resubmission deadlines (June 2009 and June 2014). Similarly, while most sources' next submission is due in June 2019, because of off-cycle resubmission deadlines assigned to sources who have resubmitted RMPs prior to their next 5-year resubmission date, only a portion of the RMP-regulated universe has a submission deadline occurring in June 2019.

Other than the costs for gathering information and filling out the on-line RMP form, the regulations require sources to maintain on-site documentation, perform a compliance audit every three years, provide refresher training to employees, perform a hazard analysis at least every five years, etc. Some of these activities are expected to occur annually or are ongoing. Some are required every three years or every five years, unless there are changes at the facility. Therefore, the burden and costs incurred by sources vary from ICR to ICR. The five-year resubmission deadline set by the regulations or assigned by EPA based on the latest RMP resubmission also will cause the burden to vary from ICR to ICR.

Form Numbers: 8700-25, 8700-27, 8700-28.

Respondents/affected entities: Chemical manufacturers, petroleum refineries, water treatment systems, agricultural chemical distributors, refrigerated warehouses, chemical distributors, non-chemical manufacturers, wholesale fuel distributors, energy generation facilities, etc.

Respondent's obligation to respond: Mandatory (40 CFR part 68).

Estimated number of respondents: 13,396 (total).

Frequency of response: On occasion.

Total estimated burden: 54,000 hours (per year). Burden is defined at 5 CFR 1320.03(b)

Total estimated cost: \$6,680,625 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the estimates: There is a decrease of 26,546 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. The reason for this decrease is because this ICR period does not include a major filing deadline year and the previous ICR did include a major filing deadline. Second, the number of sources subject to the regulations

fluctuates regularly, and is lower in this ICR period than in the previous ICR.

Acting Director, Collection Strategies Division.

Required disclosures consist of financial reports for the current and preceding year, which can be photocopied directly from the year-end call reports. The FDIC may also require, on a case-by-case basis, that descriptions of enforcement actions be included in disclosure statements. With certain exceptions, section 24 of the FDI Act limits the direct equity investments of state chartered banks to equity

investments that are permissible for national banks. In addition, the statute prohibits an insured state bank from directly engaging, as a principal, in any activity that is not permissible for a national bank, or indirectly through a subsidiary in an activity that is not permissible for a subsidiary of a national bank, unless such bank meets its minimum capital requirements and the FDIC determines that the activity does not pose significant risk to the Deposit Insurance Fund. The FDIC can make such a determination for exception by regulation or by order. The FDIC's implementing regulation for section 24 is 12 CFR part 362.
