SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau plans to request an extension of the current OMB approval to conduct a variety of small-scale questionnaire pretesting activities under this generic clearance. A block of hours will be dedicated to these activities for each of the next three years. OMB will be informed in writing of the purpose and scope of each of these activities, as well as the time frame and the number of burden hours used. The number of hours used will

not exceed the number set aside for this purpose.

This research program will be used by the Census Bureau and survey sponsors to improve questionnaires and procedures, reduce respondent burden, and ultimately increase the quality of data collected in the Census Bureau censuses and surveys. The clearance will be used to conduct pretesting of decennial, demographic, and economic census and survey questionnaires prior to fielding them. Pretesting activities will involve one of the following methods for identifying measurement problems with the questionnaire or survey procedure: Cognitive interviews, focus groups, respondent debriefing, behavior coding of respondent/interviewer interaction, and split panel tests.

Foreign-Trade Zones Board

[B-75-2015]

Foreign-Trade Zone (FTZ) 76— Bridgeport, Connecticut; Notification of Proposed Production Activity; MannKind Corporation (Inhalable Insulin); Danbury, Connecticut

MannKind Corporation (MannKind), an operator of FTZ 76, submitted a notification of proposed production activity to the FTZ Board for its facilities in Danbury, Connecticut, within FTZ 76. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on October 29, 2015.

A separate application for subzone designation at the MannKind facilities was submitted and will be processed under Section 400.31 of the FTZ Board's regulations (Doc. S-147-2015). The facilities are used for the production of inhalable insulin. Pursuant to 15 CFR 400.14(b), FTZ activity would be limited to the specific foreign-status material and specific finished product described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt MannKind from customs duty payments on the foreign-status ingredient used in export production. On its domestic sales, MannKind would be able to choose the duty rate during customs entry procedures that applies to inhalable insulin (duty-free) for the foreign-status ingredient, fumaryl diketopiperazine (duty rate—6.5%). Customs duties also could possibly be deferred or reduced on foreign-status production equipment.
