Similarly, if the Commission were to amend its rules to authorize at-home interpreting for VRS, the impact of existing VRS regulations on small entities could be reduced because providers would have additional flexibility to structure their VRS operations so as to minimize cost and maximize efficiency.

40. Regarding the possible additional record-keeping and reporting requirements that could be adopted if the Commission were to authorize skills-based routing, deaf interpreters, or assignment of ten-digit numbers to hearing individuals using video phones, the Commission is seeking comment on the alternative of allowing providers to choose whether to provide such features and incur the associated compliance requirements.

SUPPLEMENTARY INFORMATION:

I. Background

DoD, GSA, and NASA are proposing to amend the Federal Acquisition Regulation (FAR) to re-designate the terminology for unique identification of entities receiving Federal awards. The change to the FAR will remove the proprietary standard or number. Unique identification of such entities is critical to ensure Federal dollars are awarded to responsible parties, awardees are paid in a timely manner, and awards are appropriately recorded and reported. This is currently accomplished through regulation (*i.e.*, the FAR) using the proprietary Data Universal Numbering System (DUNS®) number from Dun and Bradstreet. This rule proposes to eliminate references to the proprietary standard or number and to provide appropriate references to the Web site where information on the unique entity

identifier used for Federal contractors will be located. In addition, the proposed rule establishes definitions of "unique entity identifier", and "electronic funds transfer (EFT) indicator".

In recent years, legislation has been enacted (*e.g.*, the Federal Funding Accountability and Transparency Act and the Digital Accountability and Transparency Act) that requires expanded identification of entities working with the Government and the development of standards, processes, and policies to better trace Federal dollars from appropriation to final outcomes or results. Creation and maintenance of data standards will facilitate collection and display of essential information. A data standard for identification of entities receiving Federal awards has been developed as part of the implementation for the Digital Accountability and Transparency Act and is available at <http://fedspendingtransparency.github.io/whitepapers/unique-id-business-name/>.

Going forward, the Federal Government will establish a transparent process for exploring potential alternatives to existing entity identifiers. Office of Management and Budget (OMB) and Treasury, in collaboration with the General Services Administration and the Award Committee for E-Government will establish a process for considering options, including soliciting information about viable alternatives from and reaching out about nonproprietary alternatives to all sectors, including private companies, nonprofits, and Federal government providers. This process will result in an analysis of alternatives for the unique identification of entities working with the Federal government while maintaining the statutory and regulatory integrity protections for the needs of the various awarding communities (loans, financial assistance, procurement, etc.) as well as transparency communities. The analysis of alternatives will include consideration of costs, implementation considerations, and protections for Federal taxpayers. The analysis of alternatives is anticipated to be completed in Fiscal Year (FY) 2017.

Although the Government is not currently in a position to move away from use of the DUNS number in the short term, elimination of regulatory references to a proprietary entity identifier will provide opportunities for future competition that can reduce costs to taxpayers. The current requirement limits competition by using a proprietary number and organization to

meet the identification need as well as the need for other business information associated with that number.

II. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is not a significant regulatory action and, therefore, was not subject to review under section 6(b) of E.O. 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

III. Regulatory Flexibility Act

DoD, GSA, and NASA do not expect this rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.* However, an Initial Regulatory Flexibility Analysis (IRFA) has been prepared consistent with 5 U.S.C. 605. The IRFA is summarized as follows:

The rule is being proposed to remove a proprietary standard or number for the unique identification of entities receiving Federal awards. The current requirement limits competition by using a proprietary number and organization to meet the identification needs.

Unique identification of such entities is critical to ensure Federal dollars are awarded to responsible parties, awardees are paid in a timely manner, and awards are appropriately recorded and reported. This is currently accomplished through regulation in the FAR using the proprietary Data Universal Numbering System (DUNS®) number from Dun and Bradstreet. This rule proposes to eliminate references to the proprietary standard or number, and to provide appropriate references to the Web site where information on the unique entity identifier used for Federal contractors will be designated.

Although the Government does not intend to move away from use of the DUNS number in the short term, elimination of regulatory references to a proprietary entity identifier will provide opportunities for future competition that can reduce costs to taxpayers.

The proposed rule is internal to the Government and does not directly impose any requirements on the vendor community. However, the rule may affect certain entities if those entities have arranged certain of their business systems to utilize, accept, or otherwise recognize the existing unique

identifier (DUNS Number) and should that unique identifier be changed at some point to another identifier. As of June 2015, there were 380,092 unique and active DUNS numbers designated in the System for Award Management and attributed to Government contracting.

There is no change to recordkeeping as a result of this rule.

The rule does not duplicate, overlap, or conflict with any other Federal rules.

There are no known significant alternative approaches to the rule that would meet the requirements.

The Regulatory Secretariat has submitted a copy of the IRFA to the Chief Counsel for Advocacy of the Small Business Administration. A copy of the IRFA may be obtained from the Regulatory Secretariat. DoD, GSA, and NASA invite comments from small business concerns and other interested parties on the expected impact of this rule on small entities.

DoD, GSA, and NASA will also consider comments from small entities concerning the existing regulations in subparts affected by the rule in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 610 (FAR Case 2015–022), in correspondence.

IV. Paperwork Reduction Act

The rule does not contain any information collection requirements that require the approval of the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. chapter 35).
