

for the airport) and prepare a report. If there is not an existing business/marketing plan a business/marketing plan or strategy must be developed. The report must contain:

- (1) Whether the original business/marketing plan is still appropriate;
- (2) Is the airport continuing to work towards the goals established in the business/marketing plan;
- (3) Discuss how the MAP projects contained in the application contribute to the goals of the sponsor and their plans; and
- (4) If the business/marketing plan no longer applies to the current goals of the airport, how has the airport altered the business/marketing plan to establish a new direction for the facility and how do the projects contained in the MAP application aid in the completion of the new direction and goals and by what date does the sponsor anticipate graduating from the MAP.

This notice is issued pursuant to Title 49 U.S.C. 47118.

Issued at Washington, DC, on November 9, 2015.

A. Background

On August 19, 2014, FTA published a **Federal Register** notice (initial notice) (Docket No. FTA-2014-0006, 79 FR 49146) for comment on proposed revisions to the NTD Reporting Manual. The notice described various proposed changes to the NTD annual module, including a revised capital asset inventory reporting module for urban reporters, which is the subject of this supplemental notice.

The proposed changes to the NTD Reporting Manual stem from amendments to Federal transit law made by the Moving Ahead for Progress in the 21st Century Act (MAP-21) (Pub.

L. 112-141, July 6, 2012), which require recipients of Chapter 53 funds to report to the NTD any information relating to a transit asset inventory or condition assessment conducted by the recipient. 59 U.S.C. 5335(c). Currently, the NTD collects asset inventory information on revenue vehicles and summary counts for other asset categories, such as maintenance facilities and fixed guideway. There are some assets, such as signal or communications systems, for which NTD collects no data. In the initial notice, FTA proposed to collect additional asset inventory data to meet the asset inventory and condition reporting requirements at 49 U.S.C. 5335(c).

In the initial notice, FTA proposed that the NTD Asset Inventory Module collect the following data through a recipient's submission of electronic forms:

- **Agency Identification.** Collects organizational and contact information.
- **Administrative and Maintenance Facilities.** Collects information on administrative and maintenance facilities used to supply transit service, including facility name, street address, square footage, year built or substantially reconstructed, primary transit mode supported, and estimated replacement cost.
 - **Passenger and Parking Facilities.** Collects information on passenger and passenger parking facilities used in the provision of transit service, including facility name, street address, square footage and number of parking spaces, year built or substantially reconstructed, primary mode, and estimated replacement cost.
 - **Rail Fixed Guideway.** Collects data on linear guideway assets and power and signal equipment, including the length of specific types of guideway and corresponding equipment, reported as network totals by mode and operating agreement. The data includes quantity, expected service years, date of construction or major rehabilitation (within a ten year window), and estimated replacement cost.
 - **Track.** Collects data on track assets, including length and total number of track special work, reported as network totals by rail mode and operating agreement. The data includes expected service years and date of construction or major rehabilitation.
 - **Service Vehicles.** Collects data on service vehicles that support transit service delivery, maintain revenue vehicles, and perform administrative activities. The data includes quantity, expected service life, year of manufacture, and estimated replacement cost.
