Notice of Lodging of Proposed First Modification to Consent Decree Under the Clean Air Act

In 2012, the United States District Court for the Western District of Pennsylvania entered a Consent Decree in the case of *United States, et al. v. Essroc Cement Corp.*, Civil No. 2:11-cv-01650-DSC (“2012 Consent Decree”), which resolved claims arising under the Clean Air Act against the defendant. The 2012 Consent Decree covers all of Essroc’s U.S. cement plants. On November 10, 2015, the United States lodged a proposed “First Modification to Consent Decree” in the same case. The proposed First Modification only affects the defendant’s cement plants in Indiana and Puerto Rico.

The proposed First Modification to Consent Decree resolves a dispute that arose under the 2012 Consent Decree. In December 2013, the U.S. Environmental Protection Agency (EPA) rejected Essroc’s Selective Catalytic Reduction (SCR) Pilot Study Report for the Logansport, Indiana cement plant. Essroc disputed EPA’s action and initiated the dispute resolution procedure provided by the 2012 Consent Decree. Under the proposed First Modification to Consent Decree, Essroc will perform a new SCR Pilot Study and will accept more stringent NO_x emission standards than originally provided by the 2012 Consent Decree on certain facilities, but will not have to permanently install SCR on one of its Indiana cement kilns even if the Pilot Study demonstrates the viability of SCR, as a NO_x control system on that kiln.

The State of Indiana and the Commonwealth of Puerto Rico are co-plaintiff settlers on the original Consent Decree. Indiana agrees to give up the permanent installation of SCR on an Indiana cement kiln and stipulated penalties for violations of the Consent Decree at Essroc’s Indiana facilities in exchange for: Performance of an SCR demonstration project in Indiana; more stringent NO_x emission limits on two cement kilns located in Speed, Indiana; ammonia continuous emission monitoring systems on two Logansport kilns; and an enhanced mitigation project at the Logansport facility. Puerto Rico agrees to give up stipulated penalties for violations of the Consent Decree at Essroc’s San Juan cement plant in exchange for more stringent NO_x emission limits on that facility.

The publication of this notice opens a period for public comment on the proposed First Modification to Consent Decree. Comments should be addressed

to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States, et al., v. Essroc Cement Corp.*, Civil No. 2:11-cv-01650, D.J. Ref. Originally authorized by the *Death in Custody Reporting Act (DICRA) of 2000*, the Death in Custody Reporting Program (DCRP) is the only national database that can inform the issue of mortality in local jails and prisons in depth. BJS uses this data to track and report on total and cause-specific deaths and mortality rates in correctional facilities. The local jail portion of the collection is now part of the BJS Annual Jail Collection, and is not addressed in this notice. The arrest-related death collection, which was historically part of the DCRP, has been temporarily suspended and is also not part of this clearance.

The DCRP-prisons collection has two components: a summary count of the number of deaths occurring in state departments of correction and individual-level death forms that collect information on inmates dying while in the custody of state prisons. Specifically, the following items are collected:
