**SUMMARY:** In July, September, and October, 2015, the Bureau of Land Management (BLM) published three separate proposed rules in the **Federal Register** that would update and replace its existing oil and gas rules and standards for site security (Onshore Oil and Gas Order (Order) No. 3), oil measurement (Order No. 4), and gas measurement (Order No. 5) at onshore oil and gas facilities located on Federal and Indian (except Osage Tribe) lands. This document reopens the comment period for the proposed rule pertaining to site security (Order 3) and extends

#### **SUPPLEMENTARY INFORMATION:**

##### **Background**

On July 13, 2015, the BLM published in the **Federal Register** “Onshore Oil and Gas Operations; Federal and Indian Oil and Gas Leases; Site Security; Proposed Rule” (80 FR 40768). That

proposed rule would update and replace the requirements found in Onshore Oil and Gas Order No. 3, Site Security, with new regulations that would be codified in the Code of Federal Regulations (CFR) through the amendment of 43 CFR part 3160 and the addition of two new subparts—43 CFR subparts 3170 and 3173. The proposed rule to replace Onshore Order 3 initially had a 60-day public comment period that closed on September 11, 2015, but that comment period was extended until October 9, 2015 (80 FR 54760). The proposed rule includes provisions intended to ensure that oil and gas produced from Federal and Indian oil and gas leases are properly and securely handled, so as to ensure accurate measurement, production accountability, and royalty payments, and to prevent theft and loss.

On September 30, 2015, the BLM published in the **Federal Register** “Onshore Oil and Gas Operations; Federal and Indian Oil and Gas Leases; Measurement of Oil; Proposed Rule” (80 FR 58952). This proposed rule would update and replace the existing requirements of Order 4, Measurement of Oil, with new regulations that would be codified in the CFR through the amendment of 43 CFR part 3160 and the addition of a new subpart—43 CFR subpart 3174. It would strengthen the BLM’s policies governing production accountability by updating its minimum standards for oil measurement to reflect changes in technology and industry practices. The comment period on the proposed rule to replace Order 4 currently expires on November 30, 2015.

On October 13, 2015, the BLM published in the **Federal Register** “Onshore Oil and Gas Operations; Federal and Indian Oil and Gas Leases; Measurement of Gas; Proposed Rule” (80 FR 61646). This proposed rule would update and replace the existing requirements of Order 5, Measurement of Gas, with new regulations that would be codified in the CFR through the amendment of 43 CFR part 3160 and the addition of a new subpart—43 CFR subpart 3175. This proposed rule would strengthen the BLM’s policies governing production accountability by updating its minimum standards for gas measurement to reflect changes in technology and industry practices. The comment period on the proposed rule to replace Order 5 expires on December 14, 2015.

Since publication of these proposals, the BLM has received a number of requests that the comment periods for these proposed rules be reopened or extended, as appropriate, in order to provide additional opportunities for the

public to provide input. In response to these requests, the BLM is: (1) Reopening the comment period on Order 3 from the date of publication of this Notice until December 14, 2015, and (2) Extending the comment period on Order 4 until December 14, 2015. As result, the comment periods on all three Proposed Rules will close on December 14, 2015.

#### Public Outreach Meeting
