SUPPLEMENTARY INFORMATION:

Extension of Comment Period

On October 5, 2015, (80 FR 60125) we (NMFS) published in the **Federal Register** a request for public comment on the notice of availability of the Coastal Multispecies Recovery Plan for the California Coastal Chinook salmon (*Oncorhynchus tshawytscha*) Evolutionarily Significant Unit (ESU), the Northern California steelhead (*O.*

mykiss) Distinct Population Segment (DPS), and the Central California Coast steelhead (*O. mykiss*) DPS. The public comment period for this action is set to end on December 4, 2015. The comment period is being extended through January 18, 2016, to provide additional opportunity for public comment.

Background

The Endangered Species Act of 1973 (ESA), as amended (16 U.S.C. 1531 *et seq.*) requires we develop and implement recovery plans for the conservation and survival of threatened and endangered species under our jurisdiction, unless it is determined that such plans would not promote the conservation of the species. The Public Draft Recovery Plan was developed for three salmon and steelhead species: The California Coastal (CC) Chinook salmon ESU, and the Northern California (NC) and Central California Coast (CCC) steelhead DPSs. Between 1997 and 2000, NMFS listed the CCC steelhead DPS (62 FR 43937; August 18, 1997), the CC Chinook salmon ESU (64 FR 50394; September 16, 1999), and the NC steelhead DPS (65 FR 36074; June 7, 2000), as threatened under the ESA due to the precipitous and ongoing declines in their populations.

Our goal is to restore the threatened CC Chinook salmon, and NC and CCC steelhead to the point where they are self-sustaining populations within their ecosystems and no longer need the protections of the ESA.

The Public Draft Recovery Plan

The ESA requires recovery plans incorporate, to the maximum extent practicable: (1) Objective, measurable criteria which, when met, would result in a determination that the species is no longer threatened or endangered; (2) site-specific management actions necessary to achieve the plan's goal for the conservation and survival of the species; and (3) estimates of the time required and costs to implement recovery actions.

The Public Draft Recovery Plan provides background on the natural history, population trends and the potential threats to the viability of CC Chinook salmon, and NC and CCC steelhead. The Public Draft Recovery Plan lays out a recovery strategy to address conditions and threats based on the best available science and incorporates objective, measurable criteria for recovery. The Public Draft Recovery Plan is not regulatory, but presents guidance for use by agencies and interested parties to assist in the recovery of CC Chinook salmon, and NC and CCC steelhead. The Public Draft

Recovery Plan identifies actions needed to achieve recovery by improving population and habitat conditions and addressing threats to the species; links management actions to a research and monitoring program intended to fill data gaps and assess effectiveness of actions; incorporates an adaptive management framework by which management actions and other elements may evolve as we gain information through research and monitoring; and describes agency guidance on time lines for reviews of the status of species and recovery plans. To address threats related to the species, the Public Draft Recovery Plan references many of the significant efforts already underway to restore salmon and steelhead access to high quality habitat and to improve habitat previously degraded.

Recovery of CC Chinook salmon, and NC and CCC steelhead will require a long-term effort in cooperation and coordination with Federal, state, tribal and local government agencies, and the community. Consistent with the Recovery Plan, we will implement relevant actions for which we have authority, work cooperatively on implementation of other actions, and encourage other Federal and state agencies to implement recovery actions for which they have responsibility and authority.

In compliance with the requirements of the ESA section 4(f), NMFS is providing public notice and an opportunity to review and comment on the Public Draft Recovery Plan for CC Chinook salmon, and NC and CCC steelhead prior to its final approval.
