[Docket Nos. 50-250-LA and 50-251-LA ASLBP No. 15-935-02-LA-BD01]

Atomic Safety and Licensing Board; In the Matter of Florida Power & Light Company (Turkey Point Nuclear Generating, Units 3 and 4)

December 2, 2015.

Before Administrative Judges:

Michael M. Gibson, Chairman

Dr. Michael F. Kennedy

Dr. William W. Sager

Notice of Hearing

The Atomic Safety and Licensing Board hereby gives notice that it will convene an evidentiary hearing on January 11, 2016, to receive testimony and exhibits regarding license amendments issued to Florida Power & Light Company (FPL) that increase the temperature limit for the cooling canals at Turkey Point Nuclear Generating Units 3 and 4, located near Homestead, Florida.¹ The hearing will begin at 9:30 a.m. EST on January 11, 2016, at the Hampton Inn & Suites in Miami South/Homestead, and continue from day-to-day until completed. The Board also hereby gives notice that it will accept written limited appearance statements from members of the public regarding the license amendment.

I. Background

This proceeding concerns the cooling canal system (CCS) at Turkey Point Units 3 and 4, which provides a heat sink for the plant's safety systems.² In the CCS, heated water discharged from the plant flows over a 13-mile loop before returning to the plant for recirculation for cooling purposes.³ The technical specifications set during the 2002 license renewal establish a water

temperature limit of 100 degrees Fahrenheit, as measured at the point of intake back into the plant.⁴ Should FPL exceed the temperature limit, Units 3 and 4 would be required to undergo a dual unit shutdown.⁵

The cooling canals approached the water temperature limit in July 2014, leading FPL to request license amendments to raise the limit to 104 degrees Fahrenheit.⁶ The Nuclear Regulatory Commission (NRC) granted the license amendments on August 8, 2014, and published a notice in the *Federal Register* informing the public of the opportunity to request a hearing concerning the license amendments.⁷ In response, Citizens Allied for Safe Energy, Inc. (CASE), filed a petition to intervene and proffered four contentions challenging the license amendments.⁸ This Board was established on October 21, 2014, to preside over this proceeding,⁹ and heard oral argument regarding the admissibility of CASE's four proffered contentions on January 14, 2015, in Homestead, Florida.¹⁰

On March 23, 2015, the Board granted CASE's hearing request and admitted one of its four proffered contentions.¹¹ The admitted contention states:

The NRC's environmental assessment, in support of its finding of no significant impact related to the 2014 Turkey Point Units 3 and 4 license amendments, does not adequately address the impact of increased temperature and salinity in the CCS on saltwater intrusion arising from (1) migration out of the CCS; and (2) the withdrawal of fresh water from surrounding aquifers to mitigate conditions within the CCS.¹²

After admitting this contention, the Board ruled that the procedures of Subpart L will be used for this proceeding.¹³ The parties to this
