Fisheries Off West Coast States; Comprehensive Ecosystem-Based Amendment 1; Amendments to the Fishery Management Plans for Coastal Pelagic Species, Pacific Coast Groundfish, U.S. West Coast Highly Migratory Species, and Pacific Coast Salmon

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability; request for comments.

SUMMARY: NMFS announces that the Pacific Fishery Management Council (Council) has submitted Comprehensive Ecosystem-Based Amendment 1 (CEBA 1) for Secretarial review. CEBA 1 would bring new ecosystem component species (collectively, "Shared EC Species") into each of the Council's four fishery management plans (FMPs) through amendments to those FMPs, and would prohibit the future development of new directed commercial fisheries for Shared EC Species within the U.S. West Coast Exclusive Economic Zone (EEZ).

DATES: Comments on CEBA 1 must be received on or before February 9, 2016.

ADDRESSES: You may submit comments on CEBA 1, identified by NOAA-NMFS-2015-0123, by any of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2015-0123, click the "Comment Now!" icon, complete the required fields, and enter or attach your comments.

- *Mail:* Submit written comments to William W. Stelle, Jr., Regional Administrator, West Coast Region, NMFS, 7600 Sand Point Way NE., Seattle, WA 98115-0070; Attn: Yvonne deReynier.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.),

confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter "N/A" in the required fields if you wish to remain anonymous).

Electronic copies of CEBA 1 may be obtained from the Council Web site at <http://www.pcouncil.org>.

FOR FURTHER INFORMATION CONTACT:

Yvonne deReynier, 206-526-6129, yvonne.dereynier@noaa.gov.

SUPPLEMENTARY INFORMATION: Ocean fisheries in the EEZ off Washington, Oregon, and California are managed under the CPS, Groundfish, HMS, and Salmon FMPs. CEBA 1 includes the following amendments to the Council's FMPs: Amendment 15 to the CPS FMP, Amendment 25 to the Pacific Coast Groundfish FMP, Amendment 3 to the FMP for U.S. West Coast HMS, and Amendment 19 to the Pacific Coast Salmon FMP. All FMPs are implemented under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (MSA), 16 U.S.C. 1801 *et seq.*, by regulations at 50 CFR part 660. The MSA requires that each regional fishery management council submit any FMP or amendment to NMFS for review and approval, partial approval, or disapproval. The MSA also requires that NMFS, upon receiving a plan or amendment, publish an announcement in the **Federal Register** notifying the public that the plan or amendment is available for review and comment. NMFS will consider the public comments received during the comment period described above in determining whether to approve the FMP amendments that would implement CEBA 1.

Background

The Council maintains a Fishery Ecosystem Plan, which includes an ecosystem initiative process for reviewing fisheries management issues that may affect multiple FMPs and for developing policies and regulations to address those issues under the authority of its FMPs. Under the ecosystem initiative process, the Council has reviewed trophic connections between the West Coast EEZ's unfished forage fish species and the EEZ's predator species managed under the MSA, the Endangered Species Act, the Marine Mammal Protection Act, and the Migratory Bird Treaty Act. Through that review, the Council determined that it wanted to bring a suite of unfished and unmanaged forage fish species into its FMPs as ecosystem component (EC)
