Abstract: Water quality standards are provisions of state, tribal, and federal law that consist of designated uses for waters of the United States, water quality criteria to protect the designated uses, and an antidegradation policy. Section 303(c) of the Clean Water Act requires states and authorized tribes to establish water quality standards, and to review and, if appropriate, revise their water quality standards once every three years. The Act also requires EPA to review and either approve or disapprove the new or revised standards, and to promulgate replacement federal standards if necessary. Section 118(c)(2) of the Act specifies additional water quality standards requirements for waters of the Great Lakes system.

The Water Quality Standards Regulation (40 CFR part 131 and portions of part 132) governs national implementation of the water quality standards program. The Regulation describes requirements and procedures for states and authorized tribes to develop, review, and revise their water quality standards, and EPA procedures for reviewing and approving the water quality standards. The regulation also establishes specific additional requirements for water quality standards and their implementation in the waters of the Great Lakes system, contained in the Water Quality Guidance for the Great Lakes System (40 CFR part 132).

Form Numbers: None.

Respondents/affected entities: States, territories, and Indian tribes with EPA-approved standards; NPDES-permitted facilities that discharge into the Great Lakes.

Respondent's obligation to respond: Mandatory or required to obtain or retain a benefit, pursuant to 40 CFR parts 131 and 132.

Estimated number of respondents: 2,787 (total).

Frequency of response: Generally annual.

Total estimated burden: 292,305 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$13,579,575 (per year). There are no annualized capital or operation & maintenance costs.

Changes in Estimates: There is an increase of 15,324 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase reflects an increase in the estimated number of respondents to reflect EPA's approval of water quality standards for four additional tribes, and minor adjustments to reflect updated estimates of Great Lakes activities.
