SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing collection of information requirements in accord with the Paperwork Reduction Act of 1995 (PRA–95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those

operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The collections of information in the Hexavalent Chromium (Cr(VI)) Standards for General Industry (29 CFR 1910.1026), Shipyard Employment (29 CFR 1915.1026), and Construction (29 CFR 1926.1126) (the “Standards”) protect workers from the adverse health effects that may result from occupational exposure to hexavalent chromium. The major collections of information in these Standards include conducting worker exposure monitoring, notifying workers of their chromium exposures, implementing medical surveillance of workers, providing examining physicians with specific information, implementing a respiratory protection program, notifying laundry personnel of chromium hazards and maintaining workers' exposure monitoring and medical surveillance records for specific periods.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed collection of information requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the collection of information requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

The Agency is requesting an adjustment decrease of 47,615 burden hours (from 541,582 to 493,967 burden hours). The decrease in burden hours is due to an estimated decrease of exposed workers and a reduction in the number of plants in specific industry sectors. There is also an estimated increase in operation and maintenance costs of \$123,015, from \$46,589,912 to \$46,712,927. The increase in operation and maintenance costs is due to the increase in exposure monitoring air sampling costs, medical exam and testing costs, and costs of materials for qualitative fit testing.

Type of Review: Extension of a currently approved collection.

Title: Hexavalent Chromium (Cr(VI)) Standards for General Industry (29 CFR 1910.1026), Shipyard Employment (29 CFR 1915.1026), and Construction (29 CFR 1926.1126).

OMB Control Number: 1218–0252.

Affected Public: Businesses or other for-profits.

Number of Respondents: 75,684.

Frequency of Response: On occasion; Quarterly; Semi-annually; Annually.

Total Responses: 994,834.

Average Time per Response: Time per response ranges from 5 minutes (.08 hour) to provide a copy of a written medical opinion to a worker to 4 hours for a worker to receive a comprehensive medical examination.

Estimated Total Burden Hours: 493,967.

Estimated Cost (Operation and Maintenance): \$46,712,927.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–271; NRC–2015–0111]

Entergy Nuclear Operations, Inc.; Vermont Yankee Nuclear Power Station

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is granting exemptions in response to a request from Entergy Nuclear Operations, Inc. (ENO or the licensee) regarding certain emergency planning (EP) requirements. The exemptions will eliminate the requirements to maintain formal offsite radiological emergency plans and reduce the scope of the onsite EP activities at the Vermont Yankee Nuclear Power Station (VY), based on the reduced risks of accidents that could result in an offsite radiological release at the decommissioning nuclear power reactor. Provisions would still exist for offsite agencies to take protective actions, using a comprehensive emergency management plan (CEMP) to protect public health and safety, if protective actions were needed in the event of a very unlikely accident that could challenge the safe storage of spent fuel.
