I. Background on the Missouri Program

Section 503(a) of the Act permits a State to assume primacy for the regulation of surface coal mining and reclamation operations on non-Federal and non-Indian lands within its borders by demonstrating that its State program includes, among other things, "a State law which provides for the regulation of surface coal mining and reclamation operations in accordance with the requirements of this Act . . . ; and rules and regulations consistent with regulations issued by the Secretary pursuant to this Act." See 30 U.S.C. 1253(a)(1) and (7). On the basis of these criteria, the Secretary of the Interior conditionally approved the Missouri program on November 21, 1980. You can find background information on the Missouri program, including the Secretary's findings, the disposition of comments, and conditions of approval, in the November 21, 1980, **Federal Register** (45 FR 77017). You can find later actions concerning the Missouri program and program amendments at 30 CFR 925.10, 925.12, 925.15, and 925.16.

II. Submission of the Amendment

By letter dated August 12, 2013 (Administrative Record No. MO-678), Missouri sent us an amendment to its Program under SMCRA (30 U.S.C. 1201 *et seq.*). Missouri sent the amendment in response to a January 31, 2008, letter (Administrative Record No. MO-669) we sent to Missouri in accordance with 30 CFR 732.17(c) concerning changes to valid existing rights requirements. Missouri also made changes to eliminate required program amendments recorded at 30 CFR 925.16(p)(4), (p)(20) and (v); and program disapprovals at 30 CFR 925.12(d). Missouri revised other sections of its regulations at its own initiative. Missouri proposed revisions to title 10 of its Code of State Regulations (CSR) under Division 40 Land Reclamation Commission. The specific sections of 10 CSR 40 in Missouri's amendment are discussed in Part III OSMRE's Findings. Missouri intends to revise its program to be no less effective than the Federal regulations, to clarify ambiguities, and improve operational efficiency.
