

employees including affiliates.³³ This NOPR, if adopted, reduces (for small and large entities) the burden and expense associated with filing market-based rate applications and triennial market power updates by clarifying the current regulations and by requiring identification of only the ultimate affiliate owner(s) and affiliate owners that directly own or control generation, transmission, or inputs to electric power production, have a franchised service area, or have market-based rate authority, rather than the comprehensive ownership information currently required. In addition, the Commission clarifies and limits the types of ownership changes that must be reported to the Commission via a notice of change in status. Accordingly, the Commission certifies that this NOPR, if adopted, will not have a significant economic impact on a substantial number of small entities. An analysis under the RFA is not required.
