The International Billfish Angler Survey began in 1969 and is an integral part of the Billfish Research Program at the National Oceanic and Atmospheric Administration's (NOAA) Southwest Fisheries Science Center (SWFSC). The survey tracks recreational angler fishing catch and effort for billfish in the Pacific and Indian Oceans in support of the Pacific and Western Pacific Fishery Management Councils, authorized under the Magnuson-Stevens Fishery Conservation and Management Act (MSA). The data are used by scientists and fishery managers to assist with assessing the status of billfish stocks. The survey is intended for anglers cooperating in the Billfish Program and is entirely voluntary. This survey is specific to recreational anglers fishing

for Istiophorid and Xiphiid billfish in the Pacific and Indian Oceans; as such it provides the only estimates of catch per unit of effort for recreational billfish fishing in those areas.
