Abstract: Owners and operators of synthetic fiber production facilities are required to comply with reporting and record keeping requirements for the general provisions of 40 CFR part 60, subpart A, as well as the applicable specific standards found at 40 CFR part 60, subpart HHH. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

Form Numbers: None.

Respondents/affected entities: Synthetic fiber production plants with a

solvent-spun, synthetic fiber process that produce more than 500 megagrams (Mgs) of fiber per year.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart HHH).

Estimated number of respondents: 22 (total).

Frequency of response: Initially, semiannually, and quarterly.

Total estimated burden: 1,880 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$335,000 (per year), includes \$165,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no significant change in burden in this ICR compared to the previous ICR. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden. However, there is a slight increase in labor hours due to adding the assumption that all respondents must spend one hour annually reviewing the regulatory requirements. There is also an increase in labor costs for as a result of using updated labor rates from the Bureau of Labor Statistics to calculate burden costs.

Acting Director, Collection Strategies Division.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Secondary Aluminum Production (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), “NESHAP for Secondary Aluminum Production (40 CFR part 63, subpart RRR) (Renewal)” (EPA ICR No. 1894.08, OMB Control No. 2060–0433) to the Office of Management and Budget (OMB) for review and approval in accordance with the

Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through December 31, 2015. Public comments were previously requested via the **Federal Register** (80 FR 32116) on June 5, 2015 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before January 28, 2016.

Abstract: Owners and operators of secondary aluminum production facilities are required to comply with reporting and record keeping

This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

Form Numbers: None.

Respondents/affected entities: Secondary aluminum production facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart RRR).

Estimated number of respondents: 161 (total).

Frequency of response: Initially, occasionally and semiannually.

Total estimated burden: 12,200 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$5,340,000 (per year), includes \$4,110,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This decrease is primarily a result of updating the number of sources. A recent industry analysis conducted during development of the 2015 final rule indicates a substantial decrease in both the number of major and area source facilities subject to the rule from the estimates used in the previous ICR renewal.

Note this ICR merges the burden from EPA ICR Number 2453.01, the ICR for the 2015 final rule. Therefore, this ICR reflects additional burden items not present in the previous renewal. In addition, this ICR revises bag leak detector costs per comments received from the Aluminum Association. These changes result in an overall increase in the capital and O&M costs.
